Executive summary | Key quarterly milestones

6

In Q1 2025, HCP II closed its fifth platform, Grupo Delfín, and one add-on for Linkroad (Decide4AI)

New investments

- During Q1 2025, **HCP II closed two transactions:**
 - **Grupo Delfín** (new platform deal), a company specialized in fleet management services (**closed in February 2025**)
 - **Decide4AI** (add-on for Linkroad), a company specialized in implementing AI-based solutions (**closed in March 2025**)
- Additionally, Henko is advancing with several opportunities, including add-ons and new platform investments:
 - **Project Sesal** (add-on for Quadrante): a company specialized in risk prevention services (**NBO submitted in March 2025**)
 - **Project Venus** (add-on for Cottés): a security and surveillance services company (**external DD in progress**)
 - **Projects Fogo, Cataluña and Burgos** (add-ons for Cottés): fire protection services (**NBOs submitted in March and April 2025**)
 - **Projects Capital and Barcelona** (add-ons for Delfín): specialized in recycled spare parts (**NBOs submitted in March and April 2025**)
 - **Project Iberia** (add-on for Delfín): fleet management services (**NBO submitted in April 2025**)
 - **Project NewNet** (new platform): insurance broker buy-and-build
 - **Project Hydra** (new platform): hydraulic and industrial components retailers buy-and-build
 - **Project Sand** (new platform): civil works and engineering for telecommunications

Other

- Henko is strengthening its investment team with one new hire and two promotions:
 - **João Rato**, with over 6 years of experience in investment banking and private equity, joined Henko as Investment Manager in April 2025. He was previously an Investment Associate at Preservation Capital Partners in London and prior to that M&A Associate at Goldman Sachs
 - **Mireia Montpart** and **Pablo Oberhofer** have been promoted to Investment Associate

Executive summary | Dealflow statistics

7

During Q1 2025, Henko sourced 199 new opportunities and closed 2 deals: Grupo Delfín (new platform) and Decide4AI (add-on for Linkroad)

3.1.

| Linkroad (formerly Link)

Portfolio companies | Linkroad – Overview

14

Introduction to the Company

- Linkroad is an **international technology consulting group** focused on digital services and next-generation technology. Linkroad has a diverse service portfolio that includes governance, cloud architecture, DevOps, quality assurance, analytics, automation, digital experience and IT infrastructure, primarily serving large accounts across a wide range of industries, with >400 active clients
- In October 2023, Henko completed the acquisition of a c. 80% of stake in Link, a leading Portuguese IT services company, as a platform for a buy-and-build project (Linkroad)
- In July 2024, Linkroad made its first two acquisitions in Spain: (i) Bemobile, a digital consulting firm focused on front-end and digital channels, and (ii) Consultia IT, a consulting firm specializing in digital transformation with a strong SAP practice
- In March 2025, Linkroad closed the acquisition of its third add-on, Decide4AI, the leading Spanish independent player operating in the high-growth segments of data analytics and AI – key growth areas in our strategic plan**

Portfolio companies | Linkroad – Financials

15

On a like-for-like basis, group revenue remained broadly stable during Q1, with performance affected by lower occupancy and ongoing commercial ramp-up initiatives

Revenue – EURm

1

EBITDA – EURm

2

Working capital – EURm

3

Net financial debt⁽¹⁾ – EURm

4

Operating cash flow⁽²⁾ – EURm

- Group revenues remained broadly stable compared to the previous year, with strong momentum in Spain from Bemobile, Consultia and Decide4AI. Link Portugal performed in line with the prior year. However, overall revenues were impacted by underperformance in Link Brasil and Consultia Panama, mainly due to the timing of commercial ramp-up initiatives. Note that significant investments were made in Link Brasil during H2 2024, and we expect these to translate into robust revenue growth over the course of 2025
- Profitability was impacted in Q1 2025 by low occupancy in Link Portugal (mainly due to project deviations), team rebuilding efforts in Brazil, along with seasonal effects in Brazil and Panama. Note that Link applies a conservative accounting approach, with provisions—mainly for bonuses—typically reversed in Q4, boosting year-end EBITDA
- Working capital increased to €14.1m, primarily due to the execution of projects started in December, which reduced client advance payment balances
- NFD Includes (i) €27.5m of acquisition debt, (ii) €2.5m of operating debt (mostly working capital lines), (iii) €7.0m of cash and (iv) transaction related payments (€0.4m in escrow, €0.7m pending transaction expenses and €4.0m achieved earn-outs payable in 2025). In the context of the acquisition of Decide4AI, we have refinanced our debt with Novobanco and secured a new financing pack with Generali and Banca March with attractive terms and possibility to releverage for additional acquisitions

Source: Henko analysis

Note (1): all financials are like-for-like, incorporating data of all acquired companies, except for the NFD as of Dec-24, which does not include the Decide4AI transaction financing

Note (2): operating cash flow excludes CapEx and non-operating companies

Portfolio companies | Linkroad – Performance

16

Marked-to-market valuation based on adjusted market multiples results in a 2.0x and 1.8x MOIC respectively for HCP I and HCP II

Value creation as of 31/03/2025 – EURm

	Entry	Current		
		HCP I	HCP Coinvestment I	HCP II
EBITDA LTM	3.8	8.9	8.9	8.9
EBITDA multiple	6.5x	8.9x	8.9x	8.9x
Total EV	24.6	79.1	79.1	79.1
Net Financial Debt	(12.2)	(23.0)	(23.0)	(23.0)
Transaction items	-	(5.1)	(5.1)	(5.1)
Equity Value	12.4	51.1	51.1	51.1
Ownership, %	80%	27%	7%	34%
Total deployment	9.9	7.1	2.1	9.4
Realised capital gain	-	0.3	-	-
Stake value	9.9	13.7	3.5	17.1
Net Capital Gains	-	6.9	1.4	7.7
MOIC	1.0x	2.0x	1.7x	1.8x
IRR	-	66%	222%	148%

- Please note that Link is an investment held between HCP I, HCP Coinvestment I and HCP II
- We apply a significant discount to current market multiples (8.9x vs. >10.0x for trading comparables)
- In the context of the Decide transaction, Linkroad (including Decide4AI) was valued at c. €110m (11.3x EV/EBITDA '24A). We have taken a more conservative view in our reporting

3.2. | Quadrante

Portfolio companies | Quadrante – Overview

18

Introduction to the Company

- Quadrante is a Portuguese **engineering consulting** company focused on design engineering for **critical infrastructure**, especially in mobility, energy and sustainability/environment
- The Company has executed more than 6,000 projects across **Europe, Africa and Latin America** with an experienced and capable **management team of four partners**
- With **Meta Engineering acquisition**, the Group has >1,000 employees and is able to deliver premier engineering services to clients in various geographies

Portfolio companies | Quadrante – Financials

19

The company is performing in line with expectations, both in terms of revenue growth and EBITDA margins. Slight margin compression due to integration of Meta Engineering

Revenue⁽¹⁾ - EURm ①

Contribution profit and margin - EURm ②

EBITDA and EBITDA margin - EURm ③

Net working capital and days - EURm ④

Net financial debt - EURm ⑤

① Revenue growth driven by:

1. **Meta Engineering acquisition**, that generated significant revenue synergies
2. Higher number of **larger** infrastructure projects (>€1m project size)
3. Increased presence in the **energy** industry, with relevant projects in the lithium space and consolidated presence in strategic verticals: **environment, mobility** and **energy**
4. Lean internal procedures thanks to **new C-suite incorporations**

② Contribution profit growth given increase in personnel productivity. Decrease in contribution margin due to increase in subcontractors' costs at Quadrante

③ EBITDA decreased compared to Q1 2024 due to an increase in subcontractors' costs that is expected to be normalized in the incoming months of the year

④ Working capital: increase in WC and WC days mainly due to Meta, which has had to use short-term WC lines during the first 3 months of the year for the Toluca project, which, according to management, they expect to normalize during the course of the year

⑤ Net financial debt: as of March-25 comprised by (i) €26.3m of Opco NFD (€36.8m in financial debt and €10.5m in cash) and (ii) €9.7m in deferred payments (€7.0m vendor loan to Quadrante founders, €2.5m vendor loan to Meta old shareholders and (iii) €0.2m of 3Drivers earnout)

Portfolio companies | Quadrante – Performance

20

Valuation based on adjusted market multiples results in a 3.9x MOIC for HCP I and HCP Co-investment and 3.8x MOIC for HCP II

Value creation as of 31/03/2025 – EURm

	Dec-23	Mar-25		
	Entry	Henko I	Henko Coinvestment	Henko II
EBITDA LTM	13.4	23.5	23.5	23.5
EBITDA multiple	3.6x	6.6x	6.6x	6.6x
Total EV	48.9	154.4	154.4	154.4
Net Financial Debt	6.9	26.3	26.3	26.3
Earn-out & transaction items	17.0	9.7	9.7	9.7
Equity value 100%	25.0	118.4	118.4	118.4
Ownership, %(1)	50.50%	20.77%	4.34%	25.12%
Attributable equity value	12.6	24.6	5.1	29.7
Realised capital gains	-	0.2	-	-
Gross capital gains	12.6	24.7	5.1	29.7
Deployment	(10.2)	(6.3)	(1.3)	(7.8)

MOIC	1.0x	3.9x	3.9x	3.8x
IRR	n.a.	233%	n.m. (2)	652%

- We value Quadrante at 6.6x EBITDA LTM, which implying a discount of 49.5% over global traded engineering peers that trade at 13.0x EBITDA LTM
- Initial deployment of €10.2m, of which €5.0m come from HCP I and €5.2m from HCP II
- Additional deployment of €5.3m related to Meta Engineering acquisition, of which €1.3m relates to HCP I, €1.3m to HCP Co-investment I and €2.7m to HCP II

Source: Henko analysis

Note (1): Henko's initial common equity stake of 49.5% with an option to buy 1.0% two years after the initial investment. Control rights in the board of directors from day 1

Note (2): IRR is not meaningful due to the short period between investment (Oct 28th, 2024) and valuation (Mar 31st, 2025)

Net financial debt - USDm

4

NFD — x Adj. EBITDA

Operating cash flow - USDm

Free cash flow — Over Adj. EBITDA

- 1 Revenues for the quarter were broadly in line with Q1 2024. The period was marked by a soft start in January, followed by a strong rebound in February and March. March revenues were 8% above the prior year, thanks to strong sales performance, particularly in the first two regions: the US and Germany, with YTD sales up 21% and 9%, respectively
- 2 Gross margin also in line with Q1 2024 and the budget (c. 52%). Overall EBITDA profitability was affected by an increase in SG&A and personnel costs, driven by new hires (e.g., new CFO and a Managing Director for the US & Global OEM Division) and salaries corrections across key geographies
- 3 Working capital days increased at a consolidated level compared to December 2024, mainly due to higher trade receivables in the US, Germany and Brazil. As a result, operating cash flow was negatively impacted by the increase in receivables
- 4 Net financial debt stands at \$32.2m, comprising \$5.6m in operating debt, \$10.1m in cash and other equivalents and \$36.7 in acquisition debt

3.4. | Cottés

Portfolio companies | Cottés – Overview

26

Introduction to the Company

- Buy and build project in civil protection installation, operations, and maintenance, with a focus in fire protection and security services
- Cottés is focused on engineering and design, installation and maintenance of fire protection systems in the Iberian market. With more than 80 employees at its headquarters in Valencia, and offices in Barcelona and Madrid, the company has carried out nearly 2,000 projects nationally and internationally in the last five years. Two main business lines: (i) fire protection systems' installation and (ii) design and installation of temperature control and smoke evacuation systems ("SHEVs"). Maintenance services represent c. 8% of turnover
- Currently in external due diligence with its first add-on, focused on security systems, with three other targets in negotiation**

Portfolio companies | Cottés – Financials

27

Focussing on projects with margins of 30% and increasing recurrent services, already positive impact in Q1'25 margins (6% vs 9% YoY) . Management expects a strong H2 performance

Turnover - EURm

1

Gross profit¹ - EURm

2

Adjusted EBITDA - EURm

3

Working Capital - EURm

4

Net Financial Debt - EURm

5

Operating cash flow - EURm

6

- Cottés has set operational focus on executing projects with high margins (c.30%). Key projects in both Fire Protection ("FP") and SHEVS such as Ontime Chiloeches (+€320k), Svan Trading (+€140k) and SAAR (+€136k) are advancing well, with high backlog contracted during Q1 (from €17.9m to €23.2m) with increasing weight in SHEVS (€4.5m)
- Gross margin (GM) improved YoY by +7% to 32% due to 1) greater execution weight of SHEVS projects (c. 31% GM) and 2) improved FP BU margins by centralizing materials purchasing and raising price of sold equipment (c. 28% GM)
- EBITDA grew in absolute (+€0.2m) and margin (+3%) terms linked to operating changes. Company has experienced slight personnel cost increase (13% revenues Dec-24 to 15% revenues Mar-25) to support growth, such as the signing of a purchasing manager

- Net increase of working capital by c. €0.6m driven by receivables change with clients such as ATG (+€248k), Gutis (+€220k), Onil (+€192k), and Ferrovial (+€184k). Cottés has around €1m in WIP which has been separated from the inventory account from Dec-24
- No cash generated QoQ largely due to WK consumption. In Q2'25 will occur the second closing which includes a €901k WK adjustment payment now reflected in NFD, along with the €342k excess cash held in HoldCo (Vesta) for both Dec-24 and Mar-25
- No cash was generated in Q1 due to working capital consumption (-€0.6m) despite growth in the EBITDA (+€0.6m). Large cash buffer of +€1.7m remains for operations with confirming lines available

Source: Henko analysis

Note (1): gross margin only includes subcontracting and purchases, not direct personnel by Cottés

3.5. | Grupo Delfín

Portfolio companies | Grupo Delfín – Overview

30

Introduction to the company

- **History:** founded in Alicante in 1993 by Mr. Jesús Martínez, current CEO. The business initially operated solely as a vehicle scrapyard. Over time, the company evolved into a comprehensive fleet management solutions provider mainly for renting companies. Delfin currently employs c.100 professionals
- **Activity:** 3 units supported by investment in technology:
 - **Fleet management:** network of >1,000 car repair shops to provide services to its clients (renting/insurance companies). Delfin also sells recycled spare parts to the car repair shop
 - **Vehicle auctions:** online platform for damaged vehicle auctions
 - **Recycled spare parts:** car dismantling and sales of recycled spare parts (mainly to repair shops)
- Henko is focusing on driving organic growth of the fleet management business unit, building on the substantial technology investments made in recent years. Now that a robust platform is in place, our efforts will center on scaling commercial activities. In addition, we will pursue an Iberian buy-and-build strategy for the recycled spare parts business, in a highly fragmented market

Grupo Delfín is performing in line with expectations in Q1 both in terms of revenue and EBITDA⁽¹⁾

Revenues - EURm

1

Gross profit and margin¹ - EURm

2

Adj. EBITDA and adj. EBITDA margin - EURm

3

Net working capital and days - EURm

4

Net financial debt - EURm

5

Operating cash flow - EURm

6

1 Revenues: 5% revenue growth compared to Q1 2024, mainly due to 15% revenue increase in vehicle auctions business line (+29 vehicles sold in March '25 compared to March '24) and entry in new clients in fleet management. Recycled spare parts is slightly behind targets

2 Gross profit and margin: growth in line with topline. Slight 2bp margin increase mainly due to improvement of margins in fleet management where we are improving the fulfilment of SLAs with our main customer

3 EBITDA: growth in line with turnover, however relative margins remained stable as we reinforced the organization with a new commercial director and a consultant to help us improve our processes in fleet management

4 Net working capital: €2.6m increase compared to Q1 2024 mainly related to €2.2m increase in inventory (€1.0m from recycled spare parts, €0.8m increase in fleet management inventory including work in progress relating to services and spare parts for workshops repairs; and €0.3m inventory increase related to vehicles auctions business line)

5 NFD: €3.7m increase compared to Q1 2024 related to (i) 2024 earnout (€3.1m accrued), (ii) €0.7m amortization of financial debt and (iii) €1.3m cash reduction, mainly due to debt amortization and WC consumption (i.e., inventory increase)

6 Operating cash flow: €0.8m decrease compared to Q1 2024 due to working capital consumption. We expect relevant cash generation in H2 as inventory should decrease both in recycled spare parts and fleet management
