On December 17th 2021 there has been a change within the investment portfolio. Portfolio company Magnus was split into three new companies (Magnus Black, Magnus Energy and Emixa) and portfolio companies Cards and Dimensys were merged into Emixa. There were no (extra) cash flows involved. Please find the allocation of the amount invested in the table above.

Fair market values are conservatively calculated by entry = exit multiple x EBITDA multiple +/- actual net debt. However, when the entry EBITDA multiple was below 5x, the fair market values are based on 5x LTM EBITDA.

2.1 AMP Groep

Legal name	SLI Services B.V.	Headquarters	Houten
Industry	Technology	Investment team	Hubert Verbeek Rutger Mulder Hidde van der Gaag
Type of investment	OBO	Co-investor	n/a
Date of investment	16 September 2020	Board representation	n/a

Company description

AMP offers specialised logistic and identification services, facilitated by a technology suite that supports the full customer journey. Services consist of identification services without delivery (e.g. onboarding of employees), identification services with delivery (e.g. eHerkenning certificates, mobile phones and confidential documents) and delivery without identification (temperature-controlled medicine).

Transaction structure at entry¹

Timeline

- Q1 2021: Large new client onboarding & positive COVID-19 impact
- Q2 2021: M&A talks with several add-on targets
- Q3 2021: Due diligence of new add-on
- Q4 2021: Debt refinance & acquired first add-on: Delta Logistiek (EUR 0.8m by HC-GBO IV)
- Q2 2022: Acquired Omega Logistics (second add-on)
- Q3 2022: Integration of add-ons & in advanced talks with third add-on
- Q4 2022: Acquired (third add-on) 2mc (EUR 2.5m by HC-GBO IV)
- Q1 2023: Customer acquisition from (fourth add-on) Reviva (EUR 0.4m by HC-GBO IV) and acquired (fifth add-on) DPN (EUR 0.2m by HC-GBO IV)
- Q2 2023: Contract extension with largest customer
- Q3 2023: Buy-out of non-operational shareholder (EUR 1.6m by HC-GBO IV) and shareholders loan (EUR 0.4m by HC-GBO IV)
- Q4 2023: Comprehensive plan for synergies (EUR 1.5m+) drawn up
- Q1 2024: Execution of cost saving initiatives & further synergy realization
- Q2 2024: Below par results due to postponement of new deliveries & customers
- Q3 2024: Executing cost-saving initiatives and setting up new business line
- Q1 2025: Focus on onboarding new customers & potential contract extension largest customer

¹ Deal structure has changed since the acquisition of Delta Logistiek in Q4 2021 and 2mc in Q4 2022 so that HC-GBO IV holds a 59.71% profit-shareholding in the company

Financials

P&L EURk	2023A	2024A	2025A YTD	2025B YTD	2025B
Sales	44,688	45,614	11,729	11,852	48,933
<i>Growth %</i>	3.0%	2.1%	0.5%	1.6%	7.3%

EBITA	2,344	2,295	678	665	3,205
<i>EBITA %</i>	5.2%	5.0%	5.8%	5.6%	6.5%
Net debt (cash)	9,438	9,164	8,996	n.a.	n.a.

The AMP Q1 2025LE results fell (slightly) below budget expectations. Revenue is below budget at EUR 11.7m versus EUR 11.9m, with gross margin trailing by EUR 0.2 million. This mainly results from delay in onboarding of new customers, as customers postpone their deliveries or are not ready yet to switch to AMP. AMP is pushing customers for faster onboarding.

Cost-saving measures and synergy initiatives are ahead of schedule resulting in lower OPEX than budget, thereby largely compensating the gross margin deficit. Additionally, AMP's investment in new business lines, such as hardware exchange services for broken laptops, is showing encouraging results, although it requires more time to fully impact the bottom line.

Net debt per March amounts to EUR 9.0m and comprises of EUR 7.3m long term bank financing, EUR 0.3m shareholder loan, and RC facility of c. EUR 1.4m.

Developments

Internal:

- AMP has identified several significant projects expected to generate synergies during 2025. The company is actively executing multiple synergy initiatives to enhance operational efficiency and support long-term growth;
- AMP is close to extending the contract with its largest customer potentially bringing additional margin of EUR 0.5m from 2025 onwards;
- Regarding ESG, in Q1, at AMP successfully passed the audits for ISO 27001, ETS and ISO 9001.

External:

- There is a lot of M&A activity in the medical and high-value logistics landscape. Holland Capital is approached on a regular basis by pan-European logistic providers with interest in AMP.

Outlook

- The liquidity situation is closely monitored to ensure financial stability. It seems to be getting back on track.
- AMP is further integrating recent add-ons into back-office operations, branding, and customer synergy initiatives to drive cohesion and operational efficiency.

Valuation

Applying a multiple of 5.5x LTM EBITDA leads to an enterprise value of EUR 17.9m. As a result, the fair market value for the stake of HC-GBO IV is EUR 5.8m, which is EUR 0.3m higher than the previous quarter. This implies a loss of EUR 1.9m on a total investment of EUR 7.7m (0.8x money multiple per Q1 2025).

2.2 Magnus Energy

Legal name	Magnum Energy Holding B.V.	Headquarters	Naarden
Industry	Technology	Investment team	Ewout Prins Laurens Platteeuw Hidde van der Gaag
Type of investment	OBO	Co-investor	n/a
Date of investment	19 November 2020 (17 December 2021 restructuring date)	Board representation	Ewout Prins

Company description

Magnus Energy provides PMO (Project Management Office) and advisory services for complex multi-stakeholder projects in the EU energy sector.

Transaction structure at restructuring²

Timeline

- Q4 2021: Completion of restructuring Magnus Energy
- Q1 2022: Initiation of B&B strategy
- Q2 2022: Obtainment of CORE CCR project
- Q3 2022: Start process to increase HC stake
- Q4 2022: Initiation of incentive program to retain key talent
- Q1 2023: Buy-out of non operational partners (EUR 225k by HC-GBO IV)
- Q2 2023: In talks with several B&B targets
- Q3 2023: Calculating business case to expand services to new business areas
- Q4 2023: Setup new business units in business consulting & technical advisory
- Q2 2024: Continued hiring of new personnel & performing due diligence on add-on
- Q3 2024: Acquired Ciratum and buy-out of non operational partner (EUR 1.6m by HC-GBO IV)
- Q4 2024: Integration of Ciratum & hired a new partner
- Q1 2025: Further integration of Ciratum & expanded service to Denmark

² On December 17th 2021, Magnus was split into Magnus Energy, Magnus Black and The Digital Transformation Groep. Original cost price for Magnus Energy was EUR 4.3m. Deal structure has changed since the buy-out of senior partners and add-on of Ciratum so that HC-GBO IV holds a 64.19% profit-shareholding in the company.

<i>EBITA %</i>	<i>39.7%</i>	<i>24.0%</i>	<i>22.1%</i>	<i>17.4%</i>	<i>21.5%</i>
Net debt (cash)	7,611	5,567	5,428	n.a.	n.a.

Magnus Energy has outperformed budget expectations in 2025A YTD, with revenue slightly higher than budget and EBITDA EUR 0.2m higher (EUR 1.0m actual vs EUR 0.8m budget). This strong performance is primarily driven by higher billability of consultants (~80%), resulting in increased revenue and EBITDA. The outperformance of Magnus Energy compensates the lower performance at Ciratum where a plan has been finalized to improve revenue and EBITDA going forward.

Net debt per March amounts to c. EUR 5.4m and comprises of EUR 5.7m bank financing, EUR 1.5m vendor loans, minus the cash balance of c. EUR 1.8m.

Developments

Internal:

- Continued international expansion through satellite offices in Bratislava (2 employees), Köln/Düsseldorf (3 employees), Vienna (3 employees), and Copenhagen (1 employee). A new office has been opened in Belgium and in Copenhagen in Q1 2025;
- Magnus Energy will focus on expanding its services to business consulting and technical advisory (incl. market & grid modelling);
- Regarding ESG, in Q1, Magnus Energy initiated follow-up discussions on Diversity, Equality, and Inclusion to gather remaining employee feedback and expectations.

External:

- Magnus Energy is currently in talks with several add-on targets both situated in the Netherlands as well as abroad.
- Magnus Energy and Holland Capital are approached on a regular basis by M&A advisers/PE-funds with an interest in Magnus Energy.

Outlook

- Progressing with the integration of Ciratum, aiming to enhance service offerings and operational synergies.
- Further expanding the business consulting & technical advisory business units.

Valuation

Applying a multiple of 6.2x LTM EBITDA leads to an enterprise value of EUR 24.7m. As a result, the fair market value for the stake of HC-GBO IV is EUR 12.4m, which is EUR 1.1m higher than the previous quarter. This implies a gain of EUR 6.4m on a total investment of EUR 6.0m (2.1x money multiple per Q1 2025).

2.3 Magnus Black

Legal name	Magnum Black Holding B.V.	Headquarters	Naarden
Industry	Technology	Investment team	Ewout Prins Laurens Platteeuw Thomas Hubert
Type of investment	OBO	Co-investor	n/a
Date of investment	19 November 2020 (17 December 2021 restructuring date)	Board representation	Ewout Prins

Timeline

- Q4 2021: Completion of restructuring Magnus Black
- Q1 2022: Establishment of stand-alone marketing approach
- Q2 2022: Start of sales director
- Q4 2022: Start of exploring exit
- Q1 2023: Market sounding with CF advisor
- Q2 2023: Exit preparation
- Q3 2023: Management presentations
- Q4 2023: Follow-up meetings with selected potential buyers
- Q1 2024: Start of DD
- Q2 2024: Finalization of DD
- Q3 2024: Exit

Exit

- Per 09/07/2024, Holland Capital signed an SPA with Hardis Group, a portfolio company of Crédit Mutuel, for an Equity Value of EUR 5.1m (excl. earn-out of EUR 4m).
- Per 10/07/2024, Holland Capital closed the sale and received an initial payment of EUR 1.6m realizing an IRR of 10% and an MM of 1.4x on invested capital of EUR 1.2m.
- Subject to achieving an EBITDA of EUR 1.0m in 2024, Holland Capital may be entitled to an additional earn-out of up to EUR 1.3m.

2.4 Emixa

Legal name	Emixa B.V.	Headquarters	Naarden
Industry	Technology	Investment team	Ewout Prins Laurens Platteeuw Thomas Hubert
Type of investment	OBO	Co-investor	n/a
Date of investment	17 December 2021	Board representation	Ewout Prins

Company description

Emixa is a combination of Magnus Digital, Dimensys and Cards that are active in the implementation of SAP, Siemens, and Mendix technology in primarily the Industry 4.0 verticals.

Transaction structure at restructuring³

Sources in EURk			Uses in EURk	
HCGB0 IV	10,528	62%	Enterprise value	27,868

Total sources	27,868		Total uses	27,868

Timeline

- Q4 2021: Completion of merger and restructuring of Magnus Digital
- Q1 2022: Completion of add-on Apronto (EUR 2.5m investment HC-GBO IV)
- Q3 2022: Completion of add-on OnePLM (EUR 4.1m investment HC-GBO IV)
- Q4 2022: Focus on 100-days plan and integration of OnePLM
- Q1 2023: Buy-out of non-operational partners (EUR 225k investment by HC-GBO IV)
- Q2 2023: Start of Group CFO
- Q3 2023: Completion of add-on LMtec
- Q4 2023: Focus on 100-days plan and integration of LMtec
- Q3 2024: Buy-out of two shareholders (EUR 0.6m investment by HC-GBO IV)

³ On December 17th 2021, Magnus was split into Magnus Energy, Magnus Black and The Digital Transformation Group (currently Emixa). Furthermore, Magnus Digital, Cards and Dimensys were restructured under TDTG (currently Emixa) with an original cost price of EUR 6.9m. In Q1 2022 Apronto was acquired with a cost price of 2.5m EUR for HC-GBO IV. In Q3 2022 OnePLM was acquired with a cost price of 4.1m EUR for HC-GBO IV. In Q1 2023 and Q3 2024 senior partners were bought out and in Q3 2023 LMtec was acquired leading to a profit share of 57.41%.

<i>EBITA %</i>	<i>13.0%</i>	<i>10.5%</i>	<i>10.6%</i>	<i>8.3%</i>	<i>9.5%</i>
Net debt (cash)	34,125	29,459	26,423	n.a.	n.a.

Emixa delivered a strong performance in the first quarter of 2025, outperforming the revenue budget by approximately EUR 0.8m and EBITDA with EUR 0.7m. Nevertheless, prime focus is placed upon cross-selling and up-selling initiatives and margin optimization for less performing business units.

Net debt per March 2025 was to EUR 26.4 m and comprises of EUR 39.0 m bank financing, EUR 1.2m vendor loan minus the cash balance of EUR 13.8m.

Developments

Internal:

- Extra attention is placed on financial/ commercial insights and forecasting (e.g. BI dashboards have been built);
- Strategic plans for reorganizations of underperforming business units have been drawn up, and will be implemented in 2025;
- Regarding ESG, in Q1, Emixa incorporated offboarding interviews into its internal processes to gather feedback on staff turnover.

External:

- M&A: ongoing talks with German targets (Mendix & SAP);
- M&A: initial talks with several SAP & Siemens targets in the Nordics.

Outlook

In Q4 2024, Emixa successfully secured several large software deals, followed by the aforementioned slight outperformance of budget in Q1 2025. Given current market developments and Emixa's strategic decision to limit hiring throughout 2024, which may result in increased FTE attrition, the company is approaching the outlook with measured caution. C. 4% revenue growth and a c. 10.5% EBITDA margin continue to be expected for 2025B. In the coming months, focus will remain on actively promoting Emixa's value proposition within its target and growth markets across each country.

Valuation

Applying a multiple of 6.1x LTM EBITDA leads to an enterprise value of EUR 68.2m. As a result, the fair market value for the stake of HC-GBO IV is EUR 24.0, which is EUR 0.8m higher than the previous quarter. This implies a gain of EUR 9.7m on a total investment of EUR 14.3m (1.7x money multiple per Q1 2025).

2.5 Purple (TSC)

Legal name	Storytelling Holding B.V.	Headquarters	Halfweg
Industry	Technology	Investment team	Ewout Prins Philip Wilms Thomas Hubert
Type of investment	OBO	Co-investor	n/a
Date of investment	2 December 2020	Board representation	n/a

Company description

Purple is a creative digital agency focusing on delivering its customers' messages in innovative ways, mostly using its proprietary content management software solution Hyro. Its services range from strategic consultancy and creative design to selling and implementing its immersive experience rooms and virtual studios. These solutions provide enterprises the possibility to deliver their message to customers, prospects, partners, shareholders and personnel in a compelling visual way.

TSC delivered a strong performance in the first quarter of 2025. However, due to the deferral of several large projects to Q2/3, gross margin and EBITDA targets were not achieved. The key focus remains on strengthening cross-selling and up-selling efforts across business units, with the goal of increasing recurring revenue for the combined group and improving overall margins.

Net debt per March amounts to EUR 2.8m and comprises of EUR 3.2 bank debt, EUR 0.5m financial lease minus EUR 0.9m cash.

Developments

Internal:

- Big steps achieved with the integration of systems (e.g. financial, CRM, HR) and processes, both in Germany as well as in The Netherlands;
- Former Pro Systems moved to a new building in Zwaag;
- Rebranding initiatives increased, per April full conversion to the new name commercially and legally: The Storytelling Company (TSC);
- Regarding ESG, in Q1 TSC has harmonized the salary structures across its various add-ons and implemented a benchmarking tool to validate salary levels. Furthermore, following recent appointments, the TSC Board of Directors now includes 2 women out of a total of 6 members.

External:

- M&A: DD with German add-on focused on immersive experiences. Expected signing per Q2 2025.

Outlook

- Full focus of MT on synergies, cross and- upselling client bases;
- For FY 2025, driven by commercial momentum, a strong order book, and the optimization of synergies, we expect continued strong performance for TSC. However, we will remain vigilant regarding market developments in the German automotive sector, as they impact key clients of the former Planworx.

Valuation

Applying a multiple of 5x LTM EBITDA leads to an enterprise value of EUR 22.7m. As a result, the fair market value for the stake of HC-GBO IV is EUR 8.3m, which is EUR 0.8m lower than the previous quarter. This implies a gain of EUR 1.5m on the total investment of EUR 6.8m (1.2x money multiple per Q1 2025).

2.6 Yes We Can Clinics

Legal name	Yes We Can Investor B.V.	Headquarters	Waalre
Industry	Healthcare	Investment team	Hubert Verbeek Margot Engels Marijn Silvis
Type of investment	OBO	Co-investor	Vijf-M (Jaap Maljers)
Date of investment	25 June 2021	Board representation	n/a

Company description

Yes We Can Clinics (YWCC) is a specialized, inpatient mental healthcare clinic for adolescents with severe mental disorders, addiction problems and behavioral problems. Its daily clinical program combines intense therapeutic treatment with various outdoor activities and a focus on fostering a feeling of community among fellows. The company developed its own treatment software package, that will be offered to third parties under the name Hawking.

Transaction structure at entry⁵

Net debt (cash)	4.510	3.088	5.257	n.a.	n.a.

YWCC achieved revenues in line with budget expectations and slightly exceeded the budgeted EBITDA for Q1. Minor variances were observed across business units: occupancy at the national clinic was slightly below budget, this was compensated by higher-than-expected occupancy at the international clinic. Zero&Sano also marginally outperformed expectations, with revenues tracking in line with the budget and personnel costs coming in 7% below projections.

Net debt per March sums up to EUR 5.3m and consists of bank debt (EUR 6.7m, increased to finance the new expansion) and a vendor loan (EUR 1.8m) minus the cash balance (EUR 3.6m).

Developments

Internal:

- The national clinic achieved an occupancy of 156 fellows in Q1, versus 159 budgeted, while the international clinic reported an occupancy of 26 beds versus 24 budgeted. The number of international fellows in the international clinics dipped in 2024 but is showing a steady increase again.
- The outpatient treatment program in Best has shown an upward trend, with occupancy increasing to 48 in Q1 compared to 45 budgeted.
- The new Zero&Sano location, which opened in February, has reached full occupancy. Overall occupancy stands at 97%, with 115 out of 118 beds occupied.
- Regarding ESG, in Q1, YWCC began developing the Impact, Risk, and Opportunity framework to initiate CSRD follow-up. Furthermore, an annual survey was conducted among the safehouse residents of Zero & Sano.

External:

- YWCC has reviewed various strategies to expand clinical capacity and decided to enlarge its current clinic. With the building permit approved, financing secured, and construction already underway since September, the clinic anticipates welcoming new patients by July 2025. YWCC is currently in the process of hiring additional employees to service the expansion.
- Hawking is currently focusing on internal projects to reduce the administrative burden of the therapists in the national clinic.

Outlook

- Oversee the construction of the new facility to ensure timely completion.
- Focus on initiatives to improve occupancy rates at the international clinic.
- Continue progressing Hawking's technology initiative to enhance service offerings and scalability.
- Start of the exit process.

⁶ The direct personnel costs are currently recorded in the OPEX.

Valuation

Applying a multiple of 5.4x LTM EBITDA leads to an enterprise value of EUR 38.1m. As a result, the fair market value for the stake of HC-GB0 IV is EUR 14.5m, which is EUR 0.5m higher than the last quarter. This implies a gain of EUR 10.4m on a total investment of EUR 4.1m (3.5x money multiple per Q1 2025).

2.7 Kids Lodge

Legal name	Kids Lodge Groep B.V.	Headquarters	Houten
Industry	Healthcare	Investment team	Hubert Verbeek Margot Engels Marijn Silvis Coen Keijzer
Type of investment	OBO	Co-investor	n/a
Date of investment	13 September 2021	Board representation	n/a

Company description

Kids Lodge is a provider of childcare facilities in the region Utrecht and Brabant. It offers both day-care and after-school care for children aged 0-13. Additionally, a wide variety of extra services are provided, including transportation from school to Kids Lodge, transportation to home, workshops, swimming classes during the after-school care, and parties. Consequently, it positions itself as a 'family center,' differentiating itself from regular childcare organizations through the extensive range of activities it offers.

<i>EBITA %</i>	14.5%	10.2%	10.6%	13.1%	13.4%

Net debt (cash) 6,768 6,551 5,760 n.a. n.a.

As of 2024, direct and indirect costs are reported separately, with direct costs included in the gross margin. In 2023, all personnel costs were recorded under OPEX.

Performance at Kids Lodge fell short of budget in Q1 2025. Revenue was impacted by lower-than-expected occupancy at the Bereboot and BSO Wijs labels, as a result ending up 2% below budgeted level. Personnel costs were 6% higher in Q1 due to higher interim expenses for the HR and Finance managers, as well as recruitment and training costs that spiked in Q1 though they were budgeted evenly throughout the year. The combination of lower occupancy and increased personnel costs led to a reduction in EBITDA for the quarter. Note that, starting in 2024 and continuing into the 2025 budget, direct and indirect costs are reported separately, with direct costs recorded under gross margin. Previously (in 2023 and earlier), all personnel costs were recorded under OPEX.

Net debt as of March totals EUR 5.8m, comprising EUR 6.7m of bank financing, a vendor loan of EUR 0.8m, earn-out of EUR 0.4m, minus EUR 2.1m of cash.

Developments

Internal:

- A rental contract has been signed for a new location at the soccer club in Zeist and Everdingen, and several other locations are under consideration
- An non-binding offer has been submitted and accepted by the seller, for a potential new add-on in the Den Bosch region. Due diligence will commence in Q2 2025
- A CFO and COO have been hired, further completing the management team and better aligning it with the needs of the larger, evolving organization
- Kids Lodge is continuing to professionalize its internal operations. Progress has been made in streamlining financial reporting across entities, enhancing the reporting of direct margins (direct vs. indirect personnel), and implementing a new software package
- Regarding ESG, in Q1 Kids Lodge made progress by gaining greater insights into their environmental footprint. A contractor is offering a platform that will provide detailed information on waste management, and a recommendation for Kids Lodge will be provided.

External:

- As of 2025, the level of childcare allowance has been increased, with the majority of parents expected to receive 96% of the maximum rate. This development is anticipated to have a positive impact on the overall market, and on KidsLodge in particular.

Outlook

- Onboard the recently hired CFO and COO, and ensure the management team becomes well-acquainted and aligned

- Start due diligence for the new potential add-on
- Continue the search for additional add-on opportunities in the Brabant region—particularly around the Helmond hub (De Bereboot)—and further explore organic expansion opportunities. Discussions with several property owners are ongoing for new (small) locations near existing sites in the Utrecht region.

Valuation

Applying a multiple of 5.5x LTM EBITDA leads to an enterprise value of EUR 16.0m. As a result, the fair market value for the stake of HC-GBO IV is EUR 7.0m, which is EUR 0.7m higher than last quarter. This implies a gain of EUR 2.7m on a total investment of EUR 4.3m (1.6x money multiple per Q1 2025).

2.8 YOEP

Legal name	YOEP Holding B.V.	Headquarters	Zoetermeer
Industry	Healthcare	Investment team	Hubert Verbeek Margot Engels Philip Wilms Floor Hofstra
Type of investment	OBO	Co-investor	n/a
Date of investment	25 November 2021	Board representation	n/a

Company description

YOEP is a youth and (young) adult mental care institute (age from 6 until 26+ years) offering outpatient specialized mental care, both diagnostics and treatment. Aside from providing mental care, YOEP has developed its own diagnosis platform (FunctioneringsProfiel – FP), where it has digitalized the diagnosis process to support healthcare professionals in the treatment process.

 Net debt (cash)	 2.991	 1.929	 1.562	 1.729	 408

Note: From 2023 the financials of DPGGZ and Groei&Glunder are included. The 2024A figures include the financials of PHHaastrecht.

The results for Q1 2025 were significantly below budget, with February in particular underperforming, despite it typically being one of the strongest months of the year. As a result, year-to-date revenue came in 11% below budget expectations.

Key drivers of this underperformance include:

- Billability rates falling short of the set standard, particularly within the GGZ 18+ segment, although initial improvement was observed in March.
- High absenteeism rates across the organisation, averaging over 9% in Q1, with a downward trend visible from January to March.
- High staff turnover among practitioners.

These factors led to a Q1 EBITDA of EUR 118k, approximately EUR 700k behind budget. Despite OPEX being below budget, this was not sufficient to offset the impact of the lower-than-expected revenue.

To address these challenges, a detailed action plan has been developed in collaboration with management. Several initiatives have been launched to improve billability and employee satisfaction. In addition, a capacity plan has been set up to monitor staff inflow and outflow, and a targeted cost plan has been implemented to structurally reduce OPEX.

Net debt per March amounts to EUR 1.6m and comprises EUR 2.5m bank financing minus EUR 0.9m of cash.

Developments

Internal:

- An interim COO has started and developed a comprehensive action plan to restore operational stability and bring revenue back in line with budget expectations.
- A specialist in absenteeism has been engaged, and there is increased focus on strengthening the recruitment team.
- A new EHR system has been implemented for both DPGGZ and PHH, supporting digital process optimisation. Implementation for the remaining teams has been postponed and will be reconsidered once YOEP's operational performance improves.
- AFAS Finance has been successfully implemented and integrated into existing systems.
- Regarding ESG, in Q1, the results of the employee satisfaction survey were incorporated into a comprehensive plan that includes various improvements and actions, such as updating the personnel handbook and the training policy.

External:

- YOEP has held multiple discussions with potential add-on companies, resulting in a bid being submitted for one particularly promising prospect.

Outlook

- Prioritize operational improvements and enhance the capabilities of the management team.
- Emphasize improving billability and reducing absenteeism within YOEP.
- Start search for new CEO.

Valuation

Applying a multiple of 5.0x LTM EBITDA leads to an enterprise value of EUR 9.9m. As a result, the fair market value for the stake of HC-GBO IV is EUR 7.2m, which is EUR 1.9m lower than the previous quarter. This implies a gain of EUR 2.2m on a total investment of EUR 5.0m (1.4x money multiple per Q1 2025).

Note: Da Vinci's fiscal year runs from October to September (hence fiscal year 2025 started 01-10-2024)

Da Vinci generated EUR 8.9m in revenue, which is significantly below the budgeted EUR 12.9m. EBITDA came in at EUR 0.8m versus a budget of EUR 1.9m. This underperformance is primarily due to a large shift in the delivery of key projects from H1 to H2, which has delayed the recognition of revenue and associated profitability. Opex was kept under control at EUR 3.4m, supported by several cost-saving measures, including delayed hiring and discretionary expense reductions. These savings are partially offsetting the revenue shortfall and are expected to support margin resilience throughout the year.

Da Vinci continues to benefit from a strong order book. The focus for the remainder of the year is on maximizing the timely conversion of this backlog into revenue, with management actively steering delivery execution to secure forecasted sales in H2. Despite a strong recovery being forecasted for the second half of the year, the latest estimate now projects revenue and EBITDA to end below the original 2025 budget.

Net debt per March amounts to EUR 5.2m and comprises EUR 5.6m bank financing, EUR 0.6m vendor loan, minus EUR 1m cash.

Developments

Internal:

- In March 2025, Da Vinci experienced an IT security incident that resulted in a temporary systems outage lasting several weeks. The situation was handled professionally, with no apparent damage to systems or data. The incident is being closely monitored, and no further issues have been reported to date.
- International Growth: A plan is being developed and executed to accelerate expansion in Southeast Asia, India, and the UK, focusing on growth opportunities in these markets.
- Focus is on converting strong H2 2025 orderbook into sales.
- Regarding ESG, in Q1 DaVinci internally prepared for the upcoming quality audits. Additionally, following the aforementioned IT incident a stricter security protocol was implemented, including a stronger password policy and a thorough evaluation of user and access rights.

External:

- In due diligence with add-on target in UK.

Outlook

- Anticipate increased revenue from Da Vinci's proprietary systems and consumables as growth investments in personnel, R&D, and the webshop begin to yield results.

Valuation

Applying a multiple of 5.3x LTM EBITDA leads to an enterprise value of EUR 13.3m. As a result, the fair market value for the stake of HC-GBO IV is EUR 5.5m, which is EUR 0.4m lower than last quarter. This implies a gain of EUR 0.6m on a total investment of EUR 4.9m (1.1x money multiple per Q1 2025).

Timeline

- Q4 2022: closing of Cuccibu including first add-on QSN
- Q1 2023: integration QSN into Cuccibu organization led to 6 cross-sales successes
- Q2 2023: hired CFO to professionalize the organization and absorb growth
- Q3 2023: assist management with best practices to increase billability and improve sales
- Q4 2023: hand-over operational responsibilities of QSN founders to Cuccibu management
- Q1 2024: the measures implemented to increase cash flow are starting to pay off
- Q2 2024: start of new CEO
- Q3 2024: launch of strategic initiatives initiated by new CEO
- Q4 2024: acquisition of DMCC (EUR 1.4m investment by HC-GBO IV)

¹⁰ Deal structure has changed since the acquisition of DMCC in Q4 2024, so that HC-GBO IV holds a 82.70% profit-shareholding in the company

In Q1 2025, Cuccibu continued to face persistent challenges. The core issues remain absenteeism and sales performance, with limited new client signings and continued reliance on existing relationships and prolongations. CEO Wouter van Bockel is now supported weekly by Hender to strengthen the sales team, and new partnerships are being established with legal boutique firms, TIC companies, and industry associations to create cross-sell opportunities. This is expected to boost sales in YTG 2025.

Liquidity pressure remains, and discussions with Rabobank regarding the deferral of two repayments are ongoing. Other liquidity measures taken include renegotiated rent payment terms, bi-weekly to weekly invoicing and renegotiated contracts with shorter payment terms. The budgeted EBITDA for H1 for Cuccibu stand-alone is approximately zero; the focus in the first half of the year is on accelerating sales, with growth expected to resume from H2 onward. DMCC continues to perform above expectations and is ahead of budget with a positive (forecasted) liquidity.

Net debt per March amounts to EUR 2.5m and comprises EUR 3.3m long term bank loan, EUR 0.3m earn-out minus EUR 1.1m cash.

Developments

Internal:

- HR
 - Consultant absenteeism remains elevated - peaking at 12% in February - and continues to impact delivery and billability.
- Organization
 - Increase of financial control by implementing Bright Analytics as a new finance dashboard.
 - New bonus structure that is based on how the company is performing and not just based on the performance of the consultant.
 - A performance-based recruiter was hired.
 - Regarding ESG, in Q1 Cuccibu initiated deep dives with various units to collect more detailed feedback in response to specific outcomes from the employee satisfaction survey conducted in the previous period.
- Sales
 - Online marketing performance is increasing and shows an increasing conversion rate on the website.
 - Rates have been increased by 2.5% over Q1, leading to an increased assignment value of signed assignments, but a lower number of assignments.

External:

- Several exit parties have expressed interest in a potential acquisition of Cuccibu. However, the focus will first be on stabilizing performance and pursuing additional add-on acquisitions before considering any potential exit opportunities.
- Received information of a potential add-on acquisition.

Outlook

- The main internal challenge is improving alignment between sales and delivery functions while also working to reduce the sickness rate.

Valuation

Applying a multiple of 6.0x LTM EBITDA leads to an enterprise value of EUR 7.1m. As a result, the fair market value for the stake of HC-GBO IV is EUR 3.8m, which is EUR 1.4m lower than the previous quarter. This implies a loss of EUR 1.4m on a total investment of EUR 5.3m (0.7x money multiple per Q1 2025).

Beyonder delivered a solid start to 2025, achieving its revenue targets in the first quarter. EBITDA outperformed expectations by EUR 190k, driven primarily by lower salary expenses and other timing-related operating cost reductions. For the remainder of FY2025, the company's strategic priorities include unifying the sales teams and intensifying cross- and up-selling initiatives across its business units. These efforts aim to expand the number of so-called "lighthouse clients" — customers who engage with multiple or all of Beyonder's service offerings.

Net debt per March amounts to EUR 8.5m and comprises of EUR 8.2 bank debt, EUR 2.6m earn-out minus EUR 2.3m cash.

Developments

Internal:

- Rebranding to Beyonder finalized, website live per January 2025;
- In Q1, focus has been placed upon the 100 day plans, integrating both Ambient Digital and Little Rocket in the way-of-working of Beyonder. Extra attention is been placed upon the sales & marketing initiatives.
- Regarding ESG, In Q1, the Works Council for Beyonder was officially launched. Furthermore, the company has begun working on a sustainability report for 2024. Several actions have also been initiated to align policies at the group level, such as a code of conduct.

External:

- M&A: ongoing discussions with potential add-ons in the Nordics as well as Benelux.

Outlook

- A strong pipeline, substantial order book and significant room & expectation for upsell at existing clients, indicate a promising outlook for 2025. First cross-sell initiatives are established with a first client to be services by multiple business units.

Valuation

Applying a multiple of 6.1x LTM EBITDA leads to an enterprise value of EUR 27.4m. As a result, the fair market value for the stake of HC-GBO IV is EUR 7.3m, which is EUR 0.9m higher than the previous quarter. This results in a gain of EUR 1.3m on the total investment of EUR 6.0m (1.2x money multiple per Q1 2025).

2.12 Attenza

<i>Legal name</i>	Attenza Group B.V.	<i>Headquarters</i>	Barendrecht
<i>Industry</i>	Healthcare	<i>Investment team</i>	Ewout Prins Margot Engels Marijn Silvis Coen Keijzer
<i>Type of investment</i>	OBO	<i>Co-investor</i>	n/a
<i>Date of investment</i>	13 June 2023	<i>Board representation</i>	n/a

Company description

Attenza provides palliative and terminal care for patients who prefer to pass away at home. Through its specialized software application, Attenza can typically commence care within 24 hours of receiving a referral. Home care organizations, hospitals, and general practitioners refer patients to Attenza. The company is certified with a WTZA certification and maintains contracts with healthcare insurers.

Transaction structure

Total sources	6,537		Total uses	6,537

Timeline

- Q2 2023: Transaction completed and initiation of the 100-day plan.
- Q4 2023: NBO outstanding for an intermediary providing services in terminal palliative care.
- Q1 2024: Attenza began developing new initiatives for additional revenue streams, including partnerships with hospices and private care services.
- Q2 2024: A marketing campaign to expand revenue led to new privately paying clients. Takeover discussions with a private care intermediary were held, and an NBO will be prepared.
- Q3 2024: Due diligence commenced for the potential private care intermediary add-on. Discussions with hospices to explore partnerships for providing care services are ongoing.
- Q4 2024: Due diligence was completed for the potential private care intermediary add-on, but closing was put on hold due to Attenza's underperformance.
- Q1 2025: Focus on rolling out commercial growth initiatives and optimizing the cost base

Net debt (cash)	1,132	771	767	n.a.	n.a.

While Attenza's sales still trailed its budget, Gross Margin and EBITDA significantly outperformed, primarily due to ongoing efforts in private client care, a shifting service mix from 24hr care to higher margin night care and relatively cheaper care purchasing (freelancer costs). Moreover, since March, the average duration of patient care also reversed its downward trend, currently sitting at 10.4 hours and 7.0 hours for 24hr care and night care respectively (up from 8.6 hours and 5.2 hours in February). Attenza delivered over 2,600 shifts in Q1 2025, which was under budget, although top-line underperformance was partially offset by the previously mentioned higher duration of care. Attenza also continued ongoing efforts in private care, serving 10 private clients in Q1, and a total of 5 in March, which was the shared highest number of served private clients since efforts started in 2024. Furthermore, over 150 private client shifts were delivered in Q1, significantly above budget. In Q1 2025, Attenza also established and initiated several cost-optimizing initiatives, amongst which a more efficiently operating IT team, further digitization of the data analytics function, and flex office cutting, which will likely start benefitting the company from next quarter.

Net debt per March totals EUR 0.8 million, consisting of EUR 1.6 million in bank debt minus EUR 0.8 million in cash.

Developments

Internal:

- The Supervisory Board was professionalized and diversified, with two members replaced by individuals with relevant healthcare backgrounds. First RvC sessions have taken place.
- KPI dashboard and financial reporting process are being streamlined.
- Established and initiated cost optimizations.
- Regarding ESG, in Q1, Attenza finalised Phase 1 of the NEN 7510 implementation. Several points requiring attention were identified in preparation for the audit in June. In relation to the NEN standard, improvements have been made to the data processing agreements with suppliers. These changes have been implemented accordingly, including on the website.

External:

- Due diligence was completed for the potential private care intermediary add-on. However, the closing was put on hold due to Attenza's underperformance. In the meantime, Attenza and the potential add-on have agreed to a partnership to refer (terminal) palliative patients that the private care provider cannot accommodate.
- Attenza continues to explore organic growth opportunities by establishing terminal care services for privately paying clients and expanding its services to hospices. In Q1 2025, 10 private clients received care.
- New subcontracting relationships were established with three relatively large homecare organizations

Outlook

- Focus on increasing the inflow of new patients by securing new referral in key regions and active relationship with current referrers
- Continued conversations with healthcare insurers with whom Attenza does not have a contract yet.
- Diversifying to additional revenue streams from privately paying clients and services to hospices.
- Monitor performance and reevaluate possibility to acquire private care add-on.
- Complete streamline and optimization of financial reporting and KPI dashboarding.

Valuation

Applying a multiple of 6.1x LTM EBITDA leads to an enterprise value of EUR 4.4m. As a result, the fair market value for the stake of HC-GBO IV is EUR 2.8m, which is EUR 0.4m higher than the previous quarter. This implies a loss of EUR 0.4m on a total investment of EUR 3.2m (0.9x money multiple per Q1 2025).

<i>EBITA %</i>	<i>15.8%</i>	<i>8.6%</i>	<i>(17.9%)</i>	<i>16.5%</i>	<i>14.9%</i>

Net debt (cash) 3,651 3,113 3,411 n.a. n.a.

*NB: Q1 financials are presented without a split of direct personnel expenses, which is only included in the 2025 budget figures. A correction of this reporting format is planned for Q2, in collaboration with the new CFO who will join the company in the coming quarter.

In Q1 2025, SCG generated EUR 1.7m in revenue, EUR 0.7m lower than budgeted. This decline was mainly due to a slow start at Supply Chain Company. EBITDA came in at EUR -/0.3m for the quarter, reflecting the impact of low billability levels and one-off operating expenses. From March onward, revenue and profitability began to recover. Opex are expected to remain stable going forward as the organisation had already expanded in anticipation of growth. With the expected conversion of the order book from April onwards, management remains confident in reaching the year-end revenue target of EUR 9.9m and EBITDA of EUR 1.7m.

Net debt per March amounts to EUR 3.4m and comprises EUR 2.8m bank debt, EUR 0.6m vendor loan, EUR 0.3m financial lease minus EUR 0.3m cash.

Developments

Internal:

- Liquidity remains tight due to weak EBITDA over recent quarters and one-off restructuring costs. As a result, financial covenants are not expected to be met. Since SCG also failed its 2024 end-of-year covenant, discussions with the bank are ongoing.
- Operationally, Q1 was marked by continued transition. A new COO and Tech Lead were onboarded, to replace members of the outgoing management team, concluding the leadership changes initiated last year.
- Regarding ESG, in Q1, ESG coordination responsibilities for Supply Chain group were assigned to the new COO.

External:

- In LOI negotiations with potential add-on target.

Outlook

- Operational focus on successfully converting the strong order book and improving billability and project execution, particularly within Supply Chain Company.
- Start new CFO.
- Advance the next steps in the add-on acquisition process.

Valuation

Applying a multiple of 5.8x LTM EBITDA leads to an enterprise value of EUR 2.4m. Given that net debt exceeds this amount, the fair market value for the stake of HC-GBO IV is assessed to be zero, which is 2.1m lower than last quarter. This implies a loss of EUR 4.1m on a total investment of EUR 4.1m (0x money multiple per Q1 2025).

2.14 Lopital

<i>Legal name</i>	Lopital Holding B.V.	<i>Headquarters</i>	Oisterwijk

Net debt (cash)	4.912	3.433	3.137	3.134	1.897

Revenue for Q1 exceeded budget by 2%, reaching EUR 3.187k. This represents a year-to-date increase of 15% compared to 2024. The growth is primarily driven by stronger performance in export markets, with substantial orders placed distributors in Japan and Canada. Additionally, Dutch dealer revenue rose mainly as a result of strengthened collaboration with Lopital's primary dealer. Revenue growth from export markets and dealers more than offsets the lower-than-budgeted revenue in intramural sales.

Furthermore, Lopital has expanded its product portfolio with the introduction of the *Luna X5* ceiling lift, which has enabled the company to win several tender-based projects. The increase in revenue, combined with lower-than-budgeted operating expenses, resulted in Q1 EBITDA exceeding the budget by EUR 110k.

As of March 2025, net debt amounts to EUR 3.1 million, consisting of EUR 4.5 million in bank debt, offset by EUR 1.4 million in cash.

Developments

Internal

- The Benelux sales team is now fully staffed following the recruitment of a specialist ergonomist, who adds substantive value and expertise. Moreover, multiple internal vacancies have been successfully filled, bringing staffing to a desired level.
- Strong focus on the introduction of the new patient lift, *Luna X5*, which has already resulted in multiple tender wins.
- Preparation for the certification of two redesigned chairs has commenced, aiming to reduce costs through innovative improvements and the integration of new suppliers, thereby ensuring continued competitiveness in export markets.
- A new supplier of bathtubs has been added to the product portfolio.
- Regarding ESG, in Q1, Lopital made progress in providing detailed insights into the CO₂ footprint of various components of two of their products. These insights can serve as input for assessing other products and expanding related information.

External

- Three pilot programmes are currently underway with a company that produces incontinence sensors, targeted for use in nursing homes.
- Initial introductions have been made with various potential buy-and-build opportunities, supporting the company's long-term growth strategy.
- Participation in the Arab Health trade fair resulted in the establishment of new partnerships, including a partnership with a new distributor from Poland.

Outlook

- Continued execution of the growth plan, with targeted actions across export, dealer, and institutional care sales channels.
- Ongoing product innovation efforts are expected to result in a reduction in cost prices and increased margin resilience.
- Follow-up discussions will take place with several identified buy-and-build candidates to explore strategic expansion opportunities.
- Uncertainty around orders from the USA driven by the recent import tariffs; management believes EUR 300k of budgeted revenues from the USA are at risk, and is actively exploring opportunities to offset this potential shortfall through other channels.

Valuation

Applying a multiple of 6.0x LTM EBITDA leads to an enterprise value of EUR 13.6m. As a result, the fair market value for the stake of HC-GBO IV is EUR 10.1m, which is EUR 2.3m higher than the previous quarter. This implies a gain of EUR 0.6m on a total investment of EUR 9.5m (1.1x money multiple per Q1 2025).

Company description

Adjust is a consulting firm based in the Netherlands, specializing in procurement, public EU tendering, and contract management. With approximately 150 full-time employees, Adjust serves over 400 clients across both public and semi-public sectors, as well as the private sector. The company offers consulting, interim services, and outsourcing solutions, and is developing its own technology tools to transition towards a tech-enabled business model.

As of Q1 2025, Adjust is performing below expectations, with revenue c. EUR 0.9 million and EBITDA c. EUR 0.5m behind budget. While total revenue is up 20% versus the same period last year, profitability has declined due to rising (personnel) expenses and lower-than-expected billability.

The private sector segment is underperforming, with revenue trailing the same period last year. Market conditions remain challenging, resulting in lower demand and reduced project intake. The shortfall is primarily driven by a decline in interim assignments (which make up roughly 70% of revenue in this segment) and limited commercial traction for newly launched consultancy offerings. The public and semi-public sectors show positive momentum, though growth is held back by lower-than-expected net FTE inflow.

In response to the weaker start to the year, Adjust has launched a company-wide improvement plan. Around EUR 0.4 million in short-term revenue opportunities and cost efficiencies have been identified and are being implemented. These measures are expected to support a recovery in EBITDA over the remainder of 2025.

Net debt per March amounts to EUR 14.4m and comprises EUR 10.2m bank debt, EUR 3.5m vendor loan, EUR 1.6m financial lease, minus EUR 0.9m of cash.

Developments

Internal:

- Performance: An improvement plan has been developed with Holland Capital and is now in execution; first impact is expected in Q2.
- Forecasting & planning: Forecasting tools have been implemented, with initial insights now available; focus in Q2 will be on optimizing these tools and finalizing the management reporting.
- Recruitment: A search has been started for a new BU director to lead the Private segment. Ideal candidate should have the potential to progress to the board level and serve as a strategic sparring partner for Guido (CEO).
- AI & automation: Automation efforts are underway, led by a project team using AI agents to streamline CV handling and tender drafting. A long-tail spend tool is also being introduced, with traction anticipated in the second half of the year.
- Regarding ESG, in Q1, Dennis Swart (Director of add-on Trevian) was appointed to lead ESG coordination for Adjust as a whole.

External:

- Close to signing an asset purchase agreement with a semi-public add-on target.
- In discussions with several potential add-on candidates to explore strategic fit.

Outlook

- Adjust expects financial performance to improve over the remainder of 2025, supported by the rollout of the company-wide improvement plan and additional focus on commercial traction.
- The pending asset deal with a semi-public add-on is set to add 20+ FTE and a new BU manager.

Valuation

Applying a multiple of 5.7x LTM EBITDA leads to an enterprise value of EUR 17.4m. As a result, the fair market value for the stake of HC-GBO IV is c. EUR 1.4m, which is EUR 3.0m lower than the previous quarter. This implies a loss of EUR 3.0m on a total investment of EUR 4.3m (0.3x money multiple per Q1 2025).
