5

27% deployment across 5 portfolio companies (incl. fees & expenses)

Fund overview	Fund	Strategy	Main KPIs	
	• Capital committed: €178m • First/final closing: February/October 2024 • Capital drawdown/deployed in Q2 2025: none • Capital drawdown/deployed in total: €27.1m investor capital drawn and €47.4 total capital deployed including fund financing (in portfolio and management fees & other expenses)⁽¹⁾	• Target equity tickets: €5m - €25m • Target EBITDA: €2m - €15m • Region: Spain and Portugal • Core investment areas: energy and environment, technology, healthcare and industrial technology	5	Portfolio companies
Investment activity	Portfolio companies		180	New deals reviewed Q2 2025
	• Linkroad (Jul-23/Jul-24): digital transformation consulting. Add-ons: Bemobile (Spain) (May-24), Consultia IT (Spain) (May-24) and Decide4AI (Spain) (Mar-25) • Quadrante (Dec-23/Jul-24): engineering and environmental consulting. Add-on: 3Drivers (Portugal) (Dec-23) and Meta Engineering (Spain) (Oct-24) • Balflex (Nov-24): manufacturer of high-pressure hydraulic components • Vesta (Dec-24): fire protection and security services buy-and-build • Delfin Grupo (Feb-25): fleet management solutions		€47.4m (27%)	Capital deployed

Note (1): see page 38 for more details regarding difference between capital deployed (€47.4m) and investor capital drawdowns (€27.1m)

Executive summary | Key quarterly milestones

6

Henko advanced with several new platform investments and closed the acquisition of Electro Alavesa, an add-on for Vesta focused on surveillance

New investments

- **In July 2025, HCP II closed the acquisition of Electro Alavesa (an add-on for Vesta)**, a security and surveillance services company. This is a strategically relevant acquisition for Vesta, as it adds the security services component to the buy-and-build strategy (fire protection + security services)
- During Q2 2025, Henko made progress with new platform investments:
 - **Project Mobility:** a company specialized in traffic regulation and ZBE management – **SPA negotiation in progress**
 - **Project Life:** construction and renovation of hospital spaces – **NBO accepted; internal DD in progress**
 - **Project Hydra:** buy-and-build of hydraulic and industrial components retailers – **2 NBO submitted in May and June 2025**
 - **Project Sand:** civil works and engineering for telecommunications – **NBO submitted in May 2025**
 - **Project Avera:** buy-and-build for sustainable packaging solutions – **2 NBOs submitted in May 2025**
 - **Project Cloud:** buy-and-build of cloud managed services providers – **NBO submitted in May 2025**
 - **Project NewNet:** buy-and-build of insurance brokers – **2 NBOs submitted in April 2025**
- Additionally, Henko made progress with several add-ons for the existing HCP II portfolio:
 - **Add-ons for Vesta** (fire protection and security services buy-and-build) – **6 new NBOs submitted during Q2**
 - **Add-ons for Delfín Grupo** (fleet management solutions buy-and-build) – **4 new NBOs submitted during Q2**

Other

3. | Portfolio companies

3.1. | Linkroad (formerly Link)

Portfolio companies | Linkroad – Overview

14

Introduction to the Company

- Linkroad is an **international technology consulting group** focused on digital services and next-generation technology. Linkroad has a diverse service portfolio that includes cloud architecture, analytics, artificial intelligence, automation, digital experience, governance, DevOps and quality assurance, primarily serving large accounts across a wide range of industries
- In October 2023, Henko completed the acquisition of a c. 80% of stake in Link, a leading Portuguese IT services company, as a platform for a buy-and-build project (Linkroad)
- In July 2024, Linkroad made its first two acquisitions in Spain: (i) Bemobile, a digital consulting firm focused on front-end and digital channels, and (ii) Consultia IT, a consulting firm specializing in digital transformation with a strong SAP practice
- In March 2025, Linkroad closed the acquisition of its third add-on, Decide4AI, the leading Spanish independent player operating in the high-growth segments of AI and intelligent decisioning – key growth areas in our strategic plan

Portfolio companies | Linkroad – Financials

15

On a like-for-like basis, revenues increased 6% YoY in Q2. Profitability affected by lower occupancy in Portugal in H1 and launch of new business areas in Portugal

Revenue – EURm

EBITDA – EURm

Working capital – EURm

Net financial debt⁽¹⁾ – EURm

Operating cash flow⁽²⁾ – EURm

- Group revenues grew by 5.9% in Q2 2025 vs. the same quarter last year, with YTD growth reaching 2.1%. This performance was driven by strong activity in Spain, where the group continues to deliver solid results across key accounts. YTD revenues were partially offset by a slower path in Brazil and Panama, linked to the timing of commercial ramp-up initiatives. Commercial momentum in Spain and Portugal remains positive, with a growing pipeline, particularly in GRC and SAP-related projects
- Profitability was mainly impacted by (i) the Portuguese business, which faced delivery challenges in fixed projects and lower occupancy; (ii) Decide, where Q1 was low in profitability due high onboarding of new hirings and (iii) Brazil, which is still not ramping up. Linkroad applies a conservative accounting approach, with provisions — mainly for bonuses — typically reversed in Q4, boosting year-end EBITDA, and most development (not activated) already incurred in H1.
- Working capital increased to €15.3m, primarily due to the execution of projects initiated in December, which reduced advance payments from clients.
- NFD stands at €28.5m, including (i) €27.5m of acquisition debt, (ii) €2.0m of operating debt (mostly WC lines) and (iii) €4.8m of cash. Earn-out liabilities related to 2024 audited results have been fully recognized (€3.7m). The increase in debt is explained by the acquisition of Decide (€10m), earn-outs accrued (€3.7m) and working capital consumption
- €2.5 negative operating cash flow, due to increase in WC. Please note that Linkroad generates most of its cash in Q4 due to year-end client spending and contract renewals

Source: Henko analysis

© HENKO CAPITAL PARTNERS SGEIC, S.A. / Strictly private and confidential.

Note (1): all financials are like-for-like, incorporating data of all acquired companies, except for the NFD as of Dec-24, which does not include the Decide4AI transaction financing

Note (2): operating cash flow excludes CapEx

Portfolio companies | Linkroad – Performance

16

Marked-to-market valuation based on adjusted market multiples results in a 2.0x and 1.8x MOIC respectively for HCP I and HCP II

Value creation as of 30/06/2025 – EURm

	Entry	Current		
		HCP I	HCP Coinvestment I	HCP II
EBITDA LTM	3.8	8.3	8.3	8.3
EBITDA multiple	6.5x	9.6x	9.6x	9.6x
Total EV	24.6	79.2	79.2	79.2
Net Financial Debt	(12.2)	(24.9)	(24.9)	(24.9)
Transaction items	-	(3.7)	(3.7)	(3.7)
Equity Value	12.4	50.7	50.7	50.7
Ownership, %	80%	27%	7%	34%
Total deployment	9.9	7.1	2.1	9.4
Realised capital gain	-	0.3	-	-
Stake value	9.9	13.6	3.5	17.0
Net Capital Gains	-	6.8	1.4	7.6
MOIC	1.0x	2.0x	1.7x	1.8x
IRR	-	53%	115%	93%

- Please note that Link is an investment held between HCP I, HCP Coinvestment I and HCP II
- We apply a significant discount to current market multiples (9.6x vs. >11.0x for trading comparables)
- In the context of the Decide4AI transaction, Linkroad (including Decide4AI) was valued at €109m (11.0x EV/EBITDA '24A). We have taken a more conservative view in our reporting

3.2. | Quadrante

Portfolio companies | Quadrante – Overview

18

Introduction to the Company

- Quadrante is a Portuguese **engineering consulting** company focused on design engineering for **critical infrastructure**, especially in mobility, energy and sustainable cities
- The Company has executed more than 6,000 projects across **Europe, Africa and Latin America** with an experienced and capable **management team of four partners**
- With **Meta Engineering acquisition**, the Group has >1,000 employees and is able to deliver premier engineering services to clients in various geographies

Portfolio companies | Quadrante – Financials⁽¹⁾

19

Company performing in line with expectations in terms of revenue growth. Slight margin compression due to project delays, expected to be normalized during H2 2025

Revenue - EURm

1

Contribution profit and margin - EURm

2

EBITDA and EBITDA margin - EURm

3

Net working capital and days - EURm

4

Net financial debt - EURm

5

1 YTD revenue growth driven by:

1. **Meta Engineering acquisition**, that generated significant revenue synergies
2. Higher number of **larger** infrastructure projects (>€1m project size)
3. Increased presence in the **energy** industry, with relevant projects in the lithium space and consolidated presence in strategic verticals: **environment, mobility and energy**
4. Lean internal procedures thanks to **new C-suite incorporations**

2 **Contribution profit** compression compared to previous quarter due to projects delays, which are expected to be normalized during H2 2025

3 **EBITDA**: as outset in the yearly budget, it trended in line with contribution margin. Structure costs increased as budgeted, to cater to larger project pipeline volume. EBITDA expected to improve in H2 2025 as the pipeline starts converting into revenue

4 **Working capital**: increased by €7.1m due to increase in trade receivables accounts, expected to normalize during H2 2025. Trade payables accounts remained stable during the period

5 **Net financial debt**: as of June-25 comprised by (i) €23.1m of OpCo NFD (€34.7m in financial debt and €11.6m in cash) and (ii) €9.5m in deferred payments (€7.0m vendor loan to Quadrante founders and €2.5m vendor loan to Meta old shareholders)

Portfolio companies | Quadrante – Performance

20

Marked-to-market valuation based on adjusted market multiples results in a 4.0x MOIC for HCP I and HCP Co-investment and 3.9x MOIC for HCP II

Value creation as of 30/06/2025 – EURm

	Dec-23	Jun-25		
	Entry	Henko I	Henko Coinvestment	Henko II

Revenues grew 11% YoY in Q2, bringing YTD growth to 5.3%, largely driven by strong performance in the US (+27.5% YTD). Gross margin remains in line with the budget (c. 52%)

Revenue – USDm

Gross profit and margin – USDm

EBITDA and EBITDA margin – USDm

Net working capital – USDm

Net financial debt – USDm

Operating cash flow – USDm

- The second quarter showed solid growth across the group with revenues up 11% year-on-year, driven by higher sales in all countries except Chile. Although the start of the year was soft, YTD revenues are now 5.3% above 2024, gradually recovering pace as the commercial activity normalizes. The US continues to be a key growth engine, with revenues up 27.5% YTD, now accounting for over 30% of the group
- Gross margin remained stable at around 52%, in line with budget expectations. However, EBITDA margins are still impacted by higher SG&A and personnel costs, driven by recent hires – including the new CFO and the Managing Director for the US & Global OEM Division – as well as salary adjustments across several geographies
- Working capital intensity increased vs. December 2024, primarily due to higher receivables and inventory needs in Brazil, Chile and Peru
- Net financial debt closed the quarter at \$32.0m, including \$5.7m in operating debt, \$11.6m in cash and equivalents and \$37.9m in acquisition debt

- We apply a significant discount to current market multiples (6.5x vs. >12.5x for trading comparables)

3.4. | Vesta (formerly Cottés)

Portfolio companies | Vesta – Overview

26

Introduction to the Company

- Buy-and-build project in civil protection installation, operations, and maintenance, with a focus in fire protection and security services
- In December 2024, Henko acquired Cottés, as the platform for the buy-and-build project (Vesta).** Cottés is a reference company in engineering and design, installation and maintenance of fire protection systems in the Iberian market. With more than 80 employees at its headquarters in Valencia, and offices in Barcelona and Madrid, the company has carried out nearly 2,000 projects nationally and internationally in the last five years. Two main business lines: (I) fire protection systems' installation and (ii) design and installation of temperature control and smoke evacuation systems ("SHEVs"). Maintenance services represent c. 8% of turnover
- In July 2025, we acquired Electro Alavesa, a €2m EBITDA installer of surveillance systems (not included in the figures yet), and we are in exclusive negotiations with another two companies**

Increased direct margin (+15% YoY) offset by overhead personnel such as the CFO and realization of a bonus accrual. Reduced factoring usage and payments to providers inflates Q2 working capital

Turnover - EURm

1

Gross profit⁽¹⁾ - EURm

2

Adjusted EBITDA - EURm

3

Working Capital - EURm

4

Net Financial Debt - EURm

5

Operating cash flow - EURm

6

- Revenue growth of Cottés has principally been driven by a large client (c. €2.7m accumulated) (GM c. 16%) while the SHEVS business line has advanced more in Q2. Backlog remains largely unchanged, €21.4m
- Gross margin (GM) continues to increase YoY due to the weight of SHEVS projects (c. 30% GM), improved purchasing terms from centralizing processes. Company has started implementing systems and processes for direct cost imputation which has highlighted cost saving opportunities
- EBITDA remains flat YoY due to investment in overhead personnel (new group CFO) and a bonus accrual of 50% for employees which had not been accrued to date. Historically this has not been done correctly either, suggesting that Q2 '24 figures may be slightly inflated and the QoQ performance is skewed

- Net change in WK driven by a) higher payments to providers and purchases of materials for large projects, and b) not using confirming lines during Q2 and waiting for cash payment - new group CFO is implementing stricter cash forecasting
- Generation of €0.2m from operations in Q2 increases the cash excess balance of the company to €2.0m, with €0.4m in the HoldCo, and a pending permitted dividend to be paid to the shareholders of €1.1m summing to €1.3m in net cash
- Cash generated during 2025 largely burned by working capital due to payment to clients (-€1.0m) and variation of work in progress (-€1.4m) resulting in c €0.2m FCF with residual non-operating inflows to amount to €0.3m cash generated

- Valuation multiple considered in base of applying a significant discount to publicly traded comparables
- Investment in two phases. Phase I was completed in December where we acquired a 23% stake.
- Majority stake was acquired in July 2025 including a security add-on (Electro Alavesa) results in a total equity ticket of €9.0m for the two companies (not yet included in the June 2025 figures)

3.5. | Delfín Grupo

Portfolio companies | Delfín Grupo – Overview

30

Introduction to the company

- **History:** founded in Alicante in 1993 by Mr. Jesús Martínez, current CEO. The business initially operated solely as a vehicle scrapyard. Over time, the company evolved into a comprehensive fleet management solutions provider mainly for car renting companies. Delfin currently employs c.100 professionals
- **Activity:** 3 units supported by investment in technology:
 - **Fleet management:** network of >1,000 car repair shops to provide services to its clients (renting/insurance companies). Delfin also sells recycled spare parts to the car repair shop
 - **Vehicle auctions:** online platform for damaged vehicle auctions
 - **Recycled spare parts:** car dismantling and sales of recycled spare parts (mainly to repair shops)
- Henko is focusing on driving organic growth of the fleet management business unit, building on the substantial technology investments made in recent years. Now that a robust platform is in place, our efforts will center on scaling commercial activities. In addition, we will pursue an Iberian buy-and-build strategy for the recycled spare parts business, in a highly fragmented market

2

Adj. EBITDA and adj. EBITDA margin - EURm

3

Net working capital and days - EURm

4

Net financial debt - EURm

5

Operating cash flow - EURm

6

- 1 **Revenues:** 4% revenue growth compared to Q2 2024, mainly due to 23% revenue increase in auto spare parts recycling business line thanks to new pricing policy. Fleet management and auto auctions business lines remained stable, according to forecasts
- 2 **Gross profit and margin:** growth in line with topline. Slight 2bp margin increase mainly due to improvement of margins in fleet management where we are improving the fulfilment of SLAs with our main customer
- 3 **EBITDA:** growth in line with turnover, however relative margins remained stable as we reinforced the organization with a new commercial director and a consultant to help us improve our processes in fleet management

- 4 **Net working capital:** €2.6m increase compared to YTD'24 mainly due to increase in inventory, related to (i) €1.2m increase in inventory of fleet management business (spare parts bought by Delfín but not yet invoiced to the workshops, to be normalized in coming months) and (ii) €1.1m increase in inventory of auto spare parts recycling business (high purchases of new cars during Q1 '25)
- 5 **NFD:** €0.9m decrease in NFD compared to Dec-24 due to (i) €0.7m amortization of financial debt and (ii) €0.2m increase in cash. €3.3m of NFD as of June-25 composed by (i) €0.1m of net cash in the company and (ii) €3.4m accrued EO '25 (to be paid in Q3 '25)
- 6 **Operating cash flow:** €1.1m decrease compared to YTD 2024 due to working capital consumption related to increase in inventory (relevant H2 cash generation expected from inventory reduction in recycled parts and fleet management). In YTD'25 Op. CF was €0.8m, financial debt amortization was €0.7m and EoP cash was €0.2m; €0.1m differences relate to a decrease in financial investments
