On December 17th 2021 there has been a change within the investment portfolio. Portfolio company Magnus was split into three new companies (Magnus Black, Magnus Energy and Emixa) and portfolio companies Cards and Dimensys were merged into Emixa. There were no (extra) cash flows involved. Please find the allocation of the amount invested in the table above.

Fair market values are conservatively calculated by entry = exit multiple x EBITDA multiple +/- actual net debt. However, when the entry EBITDA multiple was below 5x, the fair market values are based on 5x LTM EBITDA.

2.1 AMP Groep

Legal name	SLI Services B.V.	Headquarters	Houten
Industry	Technology	Investment team	Hubert Verbeek Rutger Mulder Hidde van der Gaag
Type of investment	OBO	Co-investor	n/a
Date of investment	16 September 2020	Board representation	n/a

Company description

AMP offers specialised logistic and identification services, facilitated by a technology suite that supports the full customer journey. Services consist of identification services without delivery (e.g. onboarding of employees), identification services with delivery (e.g. eHerkenning certificates, mobile phones and confidential documents) and delivery without identification (temperature-controlled medicine).

Transaction structure at entry¹

Timeline

- Q1 2021: Large new client onboarding & positive COVID-19 impact
- Q2 2021: M&A talks with several add-on targets
- Q3 2021: Due diligence of new add-on
- Q4 2021: Debt refinance & acquired first add-on: Delta Logistiek (EUR 0.8m by HC-GBO IV)
- Q2 2022: Acquired Omega Logistics (second add-on)
- Q4 2022: Acquired (third add-on) 2mc (EUR 2.5m by HC-GBO IV)
- Q1 2023: Customer acquisition from (fourth add-on) Reviva (EUR 0.4m by HC-GBO IV) and acquired (fifth add-on) DPN (EUR 0.2m by HC-GBO IV)
- Q2 2023: Contract extension with largest customer
- Q3 2023: Buy-out of non-operational shareholder (EUR 1.6m by HC-GBO IV) and shareholders loan (EUR 0.4m by HC-GBO IV)
- Q4 2023: Comprehensive plan for synergies (EUR 1.5m+) drawn up
- Q1 2024: Execution of cost saving initiatives & further synergy realization
- Q2 2024: Below par results due to postponement of new deliveries & customers
- Q3 2024: Executing cost-saving initiatives and setting up new business line
- Q1 2025: Focus on onboarding new customers & potential contract extension largest customer
- Q2 2025: Contract extended with largest customer

¹ Deal structure has changed since the acquisition of Delta Logistiek in Q4 2021 and 2mc in Q4 2022 so that HC-GBO IV holds a 59.71% profit-shareholding in the company

Net debt (cash)	9,164	8,426	n.a.	n.a.	n.a.

The AMP 2025YTD results fell below budget expectations. Revenue is below budget at EUR 23.2m versus EUR 23.8m, with gross margin trailing by EUR 0.5 million. This mainly results from delay in onboarding of new customers, as customers postpone their deliveries or are not ready yet to switch over to AMP. AMP is pushing customers for faster onboarding. Going forward, customers with excessive delays will partially billed. Cost-saving measures and synergy initiatives are ahead of schedule resulting in lower OPEX than budget (EUR 0.2m delta), thereby partially compensating the gross margin deficit. Additionally, AMP's investment in new business lines, such as hardware exchange services for broken laptops and home delivery of slimming medications, are showing encouraging results, although it requires more time to fully impact the bottom line.

Net debt per June amounts to EUR 8.4m and comprises of EUR 6.8m long term bank financing, EUR 0.3m shareholder loan, and RC facility of c. EUR 1.4m.

Developments

Internal:

- AMP has identified several significant projects expected to generate synergies during 2025. The company is actively executing multiple synergy initiatives to enhance operational efficiency and support long-term growth;
- AMP has extended the contract with its largest customer bringing significant additional margin from 01-2026 onwards;
- Regarding ESG, in Q2, AMP advanced its ESG initiatives by implementing a new job classification framework ("functiehuis") and updating its absenteeism procedures.

External:

- There is a lot of M&A activity in the medical and high-value logistics landscape. Holland Capital is approached on a regular basis by pan-European logistic providers with interest in AMP.

Outlook

- The liquidity situation is closely monitored to ensure financial stability. It seems to be getting back on track.
- AMP is further integrating recent add-ons into back-office operations, branding, and customer synergy initiatives to drive cohesion and operational efficiency.

Valuation

Applying a multiple of 5.5x LTM EBITDA leads to an enterprise value of EUR 17.0m. As a result, the fair market value for the stake of HC-GBO IV is EUR 5.7m, which is EUR 0.1m lower than the previous quarter. This implies a loss of EUR 2.0m on a total investment of EUR 7.7m (0.7x money multiple per Q2 2025).

2.2 Magnus Energy

Legal name	Magnum Energy Holding B.V.	Headquarters	Naarden
Industry	Technology	Investment team	Ewout Prins Laurens Platteeuw Hidde van der Gaag
Type of investment	OBO	Co-investor	n/a
Date of investment	19 November 2020 (17 December 2021 restructuring date)	Board representation	Ewout Prins

Company description

Magnus Energy provides PMO (Project Management Office) and advisory services for complex multi-stakeholder projects in the EU energy sector.

Transaction structure at restructuring²

Depreciation	(65)	(42)	(38)	(75)	(75)
EBITA	3,856	2,069	1,795	4,002	3,677
<i>EBITA %</i>	24.0%	23.3%	19.9%	21.5%	20.9%
Net debt (cash)	5,567	5,821	n.a.	n.a.	n.a.

Magnus Energy has performed below budget in 2025A YTD in terms of revenue (EUR 0.1m delta) while realizing a higher than budget EBITDA of EUR 2.1m vs EUR 1.8m budget. The lower revenue but higher gross margin and EBITDA is due to hiring fewer new consultants than budget (99 FTE actual vs 110 budget). This results in stronger bottom line performance but less revenue growth. Additionally, the outperformance of Magnus Energy compensates the lower performance at Ciratum where a plan has been put in place to improve revenue and EBITDA going forward.

Net debt per June amounts to c. EUR 5.8m and comprises of EUR 5.3m bank financing, EUR 1.5m vendor loans, minus the cash balance of c. EUR 0.9m.

Developments

Internal:

- Continued international expansion through satellite offices in Bratislava (2 employees), Köln/Düsseldorf (3 employees), Vienna (3 employees), and Copenhagen (1 employee). A new office has been opened in Belgium and in Copenhagen in 2025A YTD;
- Magnus Energy will focus on expanding its services to business consulting and technical advisory (incl. market & grid modelling);
- Regarding ESG, in Q2, the newly contracted Occupational Health Service (Arbodienst) provided trainings at Magnus Energy on workplace vitality, as well as on when and how to involve the company doctor or Occupational Health Service.

External:

- Magnus Energy is currently conducting due diligence on a potential German add-on;
- Magnus Energy and Holland Capital are approached on a regular basis by M&A advisers/PE-funds with an interest in Magnus Energy.

Outlook

- Progressing with the integration of Ciratum, aiming to enhance service offerings and operational synergies.
- Further expanding the business consulting & technical advisory business units.

Valuation

Applying a multiple of 6.2x LTM EBITDA leads to an enterprise value of EUR 25.4m. As a result, the fair market value for the stake of HC-GBO IV is EUR 12.6m, which is EUR 0.2m higher than the previous quarter. This implies a gain of EUR 6.5m on a total investment of EUR 6.0m (2.1x money multiple per Q2 2025).

2.3 Magnus Black

Legal name	Magnum Black Holding B.V.	Headquarters	Naarden
Industry	Technology	Investment team	Ewout Prins Laurens Platteeuw Thomas Hubert
Type of investment	OBO	Co-investor	n/a
Date of investment	19 November 2020 (17 December 2021 restructuring date)	Board representation	Ewout Prins

Timeline

- Q4 2021: Completion of restructuring Magnus Black
- Q1 2022: Establishment of stand-alone marketing approach
- Q2 2022: Start of sales director
- Q4 2022: Start of exploring exit
- Q1 2023: Market sounding with CF advisor
- Q2 2023: Exit preparation
- Q3 2023: Management presentations
- Q4 2023: Follow-up meetings with selected potential buyers
- Q1 2024: Start of DD
- Q2 2024: Finalization of DD
- Q3 2024: Exit

Exit

- Per 09/07/2024, Holland Capital signed an SPA with Hardis Group, a portfolio company of Crédit Mutuel, for an Equity Value of EUR 5.1m (excl. earn-out of EUR 4m).
- Per 10/07/2024, Holland Capital closed the sale and received an initial payment of EUR 1.6m realizing an IRR of 10% and an MM of 1.4x on invested capital of EUR 1.2m.
- Subject to achieving an EBITDA of EUR 1.0m in 2024, Holland Capital may be entitled to an additional earn-out of up to EUR 1.3m.
- In Q2 2025 the earn-out of EUR 0.6m was realized realizing an IRR of 18% and an MM of 1.9x on invested capital of EUR 1.2m

2.4 Emixa

Legal name	Emixa B.V.	Headquarters	Naarden
Industry	Technology	Investment team	Ewout Prins Laurens Platteeuw Thomas Hubert
Type of investment	OBO	Co-investor	n/a
Date of investment	17 December 2021	Board representation	Ewout Prins

Company description

Emixa is a combination of Magnus Digital, Dimensys and Cards that are active in the implementation of SAP, Siemens, and Mendix technology in primarily the Industry 4.0 verticals.

Transaction structure at restructuring³

Sources in EURk			Uses in EURk	
HCGB0 IV	10,528	62%	Enterprise value	27,868

Timeline

- Q4 2021: Completion of merger and restructuring of Magnus Digital
- Q1 2022: Completion of add-on Apronto (EUR 2.5m investment HC-GBO IV)
- Q3 2022: Completion of add-on OnePLM (EUR 4.1m investment HC-GBO IV)
- Q4 2022: Focus on 100-days plan and integration of OnePLM
- Q1 2023: Buy-out of non-operational partners (EUR 225k investment by HC-GBO IV)
- Q2 2023: Start of Group CFO
- Q3 2023: Completion of add-on LMtec
- Q4 2023: Focus on 100-days plan and integration of LMtec
- Q3 2024: Buy-out of two shareholders (EUR 0.6m investment by HC-GBO IV)

³ On December 17th 2021, Magnus was split into Magnus Energy, Magnus Black and The Digital Transformation Group (currently Emixa). Furthermore, Magnus Digital, Cards and Dimensys were restructured under TDTG (currently Emixa) with an original cost price of EUR 6.9m. In Q1 2022 Apronto was acquired with a cost price of 2.5m EUR for HC-GBO IV. In Q3 2022 OnePLM was acquired with a cost price of 4.1m EUR for HC-GBO IV. In Q1 2023 and Q3 2024 senior partners were bought out and in Q3 2023 LMtec was acquired leading to a profit share of 57.41%.

Financials

Net debt (cash)	29,459	24,528	n.a.	n.a.	23,762

Emixa achieved a solid performance in the first half of 2025, exceeding its cautiously set EBITDA budget by EUR 0.5m. To remain on course for the full-year target, addressing the current recruitment shortfall is essential. In parallel, the management team is concentrating on securing larger-scale projects and improving the performance of underachieving business units.

Net debt per June 2025 was to EUR 24.5 m and comprises of EUR 39.0 m bank financing, EUR 1.2m vendor loan minus the cash balance of EUR 15.3m.

Developments

Internal:

- BI dashboards have been introduced to enhance financial and commercial insight, supporting H1 overperformance tracking.
- Plans to reorganize underperforming units, such as IS-NLBE, are in motion and will be implemented in the remained of 2025.
- FTEs remain ~31 below budget, driven by attrition. Recruitment is ramping up, with 19 new hires signed to close the gap.
- Regarding ESG, in Q2, Emixa introduced a group Code of Conduct across the company. In addition, a group of female employees attended the European Women in Technology (EWIT) event.

External:

- M&A: LOI phase with German SAP player;
- M&A: NBO discussions with 2 Siemens PLM partners in the Nordics.

Outlook

Despite signs of FTE attrition continuing due to strategic hiring limitations earlier in the year, management remains cautiously optimistic. FY2025 targets are still considered achievable. Focus will remain on: (i) delivering on regional pipelines, (ii) accelerating larger project acquisition to boost utilization and cross-staffing, and (iii) strengthening Emixa's value proposition across target and growth markets in all countries.

Valuation

Applying a multiple of 6.1x LTM EBITDA leads to an enterprise value of EUR 68.2m. As a result, the fair market value for the stake of HC-GBO IV is EUR 25.6, which is EUR 1.6m higher than the previous quarter. This implies a gain of EUR 11.2m on a total investment of EUR 14.3m (1.8x money multiple per Q2 2025).

2.5 Purple (TSC)

Legal name	Storytelling Holding B.V.	Headquarters	Halfweg
Industry	Technology	Investment team	Ewout Prins Philip Wilms Thomas Hubert
Type of investment	OBO	Co-investor	n/a

**Including pro forma figures for Flora&faunavisions GmbH*

TSC delivered strong top-line growth in the first half of 2025, with sales of EUR 26.5m, supported by the addition of the new German BU. However, gross margin came in below budget, driven by the significant underperformance of former Planworx (including a loss-making project) as well as an overly optimistic budget for H1 2025. This shortfall also resulted in EBITDA falling well below budget, both in absolute and relative terms. To close the gap for FY 2025, management will review the current performance trends in the German business units and intensify commercial activities across the group.

Net debt per June amounts to EUR 6.0m and comprises of EUR 5.8 bank debt, EUR 0.5m financial lease, EUR 0.2m credit facility minus EUR 0.5m cash.

Developments

Internal:

- Following the accountant's revision of the annual figures, and the resulting significant adjustments to the 2023 and 2024 accounts, an investigation will be initiated into the reporting of former Planworx;
- Former Pro Systems move to a new building in Zwaag finished;
- Regarding ESG, in Q2, TSC initiated the Ecovadis certification process at the group level, targeting assessment by 2026. In addition, preparatory work is underway for the recertification ISO 27001 audit, and an employee satisfaction survey has been conducted.

External:

- M&A: add-on Flora&faunavisions GmbH closed.

Outlook

- Given the current challenges in Germany - both in market conditions and operational performance - the MT is fully focused on ensuring the going concern of the operation, while also gaining a clearer understanding of the historical figures.

Valuation

Applying a multiple of 5x LTM EBITDA leads to an enterprise value of EUR 26.0m. As a result, the fair market value for the stake of HC-GBO IV is EUR 8.2m, which is EUR 0.1m lower than the previous quarter. This implies a gain of EUR 1.4m on the total investment of EUR 6.8m (1.2x money multiple per Q2 2025).

2.6 Yes We Can Clinics

Legal name	Yes We Can Investor B.V.	Headquarters	Waalre
Industry	Healthcare	Investment team	Hubert Verbeek Margot Engels Marijn Silvis
Type of investment	OBO	Co-investor	Vijf-M (Jaap Maljers)
Date of investment	25 June 2021	Board representation	n/a

Company description

Yes We Can Clinics (YWCC) is a specialized, inpatient mental healthcare clinic for adolescents with severe mental disorders, addiction problems and behavioral problems. Its daily clinical program combines intense therapeutic treatment with various outdoor activities and a focus on fostering a feeling of community among fellows. The company developed its own treatment software package, that will be offered to third parties under the name Hawking.

Transaction structure at entry⁵

Net debt (cash)	3,088	3,372	n.a.	n.a.	n.a.

The first half year of 2025 shows a slightly lower than budgeted revenue, driven by a slightly lower occupancy at the national and international clinic. As personnel expenses ended up lower than anticipated, mainly as a result of a more evenly distributed ramp up of FTEs in preparation of the expansion than anticipated. As a result, H1 2025 EBITDA ended up 97k higher than budget.

Net debt per June sums up to EUR 5.9m and consists of bank debt (EUR 6.2m, increased to finance the new expansion) and a vendor loan (EUR 1.8m) minus the cash balance (EUR 2.5m).

Developments

Internal:

- The national clinic achieved an occupancy of 158 fellows in H1, versus 161 budgeted, while the international clinic reported an occupancy of 25 beds versus 24 budgeted.
- The outpatient treatment program in Best has shown an upward trend, with occupancy increasing to 45 in H1 compared to 45 budgeted.
- The new Zero&Sano location, which opened in February, has reached full occupancy. Overall occupancy stands at 97%, with 115 out of 118 beds occupied.
- Regarding ESG, in Q2, responsibility for ESG coordination for YWC was transferred to the Head of Compliance, Policy, and Research. Following the omnibus proposal for the CSRD, YWC will no longer fall within the reporting scope. In the coming months, YWC will continue its Impact, Risk, and Opportunity assessment and determine appropriate actions based on its own insights and priorities.

External:

- YWCC has reviewed various strategies to expand clinical capacity and decided to enlarge its current clinic. With the building permit approved, financing secured, and construction already underway since September, the clinic anticipates welcoming new patients by July 2025. YWCC is currently in the process of hiring additional employees to service the expansion.
- Hawking is currently focusing on internal projects to reduce the administrative burden of the therapists in the national clinic.

Outlook

- Oversee the construction of the new facility to ensure timely completion.
- Focus on initiatives to improve occupancy rates at the international clinic.
- Continue progressing Hawking's technology initiative to enhance service offerings and scalability.
- Start of the exit process.

⁶ The direct personnel costs are currently recorded in the OPEX.

Valuation

Applying a multiple of 5.4x LTM EBITDA leads to an enterprise value of EUR 40.2m. As a result, the fair market value for the stake of HC-GBO IV is EUR 16.3m, which is EUR 1.8m higher than the last quarter. This implies a gain of EUR 12.2m on a total investment of EUR 4.1m (4.0x money multiple per Q2 2025).

2.7 Kids Lodge

Legal name	Kids Lodge Groep B.V.	Headquarters	Houten
Industry	Healthcare	Investment team	Hubert Verbeek Margot Engels Marijn Silvis Coen Keijzer
Type of investment	OBO	Co-investor	n/a
Date of investment	13 September 2021	Board representation	n/a

Company description

Kids Lodge is a provider of childcare facilities in the region Utrecht and Brabant. It offers both day-care and after-school care for children aged 0-13. Additionally, a wide variety of extra services are provided, including transportation from school to Kids Lodge, transportation to home, workshops, swimming classes during the after-school care, and parties. Consequently, it positions itself as a 'family center,' differentiating itself from regular childcare organizations through the extensive range of activities it offers.

Net debt (cash)	6,521	5,962	n.a.	n.a.	n.a.

Performance at Kids Lodge fell short of budget expectations in the first half of 2025. Revenue was primarily impacted by lower-than-expected occupancy at the Bereboot and BSO Wijs labels. Gross margin percentages remained in line with the budget. Personnel costs were higher during H1, mainly due to interim expenses for the HR and Finance managers, as well as recruitment costs related to their permanent replacements—both of whom have now started. Other operating expenses were also higher than budgeted, driven by training costs, increased absenteeism, and IT integration expenses related to the AFAS implementation. As a result, overall EBITDA performance for H1 2025 ended up below budget.

Net debt as of June 2025 totals EUR 6.0m, comprising EUR 6.3m of bank financing, a vendor loan of EUR 0.8m, minus EUR 1.1m of cash.

Developments

Internal:

- A rental contract has been signed for a new location at the soccer club in Zeist and Everdingen. Additionally, several other locations are under consideration, alongside organic expansion opportunities at existing sites.
- A CFO and COO have started, and an HR Manager has been hired, further completing the management team and better aligning it with the needs of the growing organization.
- Kids Lodge continues to professionalize its internal operations. Progress has been made in streamlining financial reporting across entities, enhancing the visibility of direct versus indirect personnel costs, and implemented a new software package.
- Regarding ESG, in Q2, Kids Lodge prepared to launch an ongoing client satisfaction survey ("Verbetermeter"), which will go live in July 2025. The survey aims to gather insights and feedback from parents about the various Kids Lodge locations and services, while also promoting approachability.

External:

- In April 2025, the Dutch government announced that the plan to implement (almost) free childcare will be postponed by an additional two years, pushing the implementation date to 2029.
- Per 2025, the level of *kinderopvangtoeslag* is increased, the majority of parents will receive 96% of the maximum tariff
- Due diligence for a small-scale add-on in the Den Bosch region was aborted, as the childcare provider did not meet Kids Lodge's quality standards.

Outlook

- Onboard the recently hired CFO and COO, and ensure the management team becomes well-acquainted and aligned
- Start due diligence for a potential add-on in the Utrecht region, of which an NBO was accepted in July 2025
- Continue the search for additional add-on opportunities in the and further explore organic expansion opportunities. Discussions with several property owners are ongoing for new (small) locations near existing sites in the Utrecht region.

Valuation

Applying a multiple of 5.5x LTM EBITDA leads to an enterprise value of EUR 15.8m. As a result, the fair market value for the stake of HC-GBO IV is EUR 6.7m, which is EUR 0.3m lower than last quarter. This implies a gain of EUR 2.4m on a total investment of EUR 4.3m (1.6x money multiple per Q2 2025).

2.8 YOEP

Legal name	YOEP Holding B.V.	Headquarters	Zoetermeer
Industry	Healthcare	Investment team	Ewout Prins Margot Engels Philip Wilms Floor Hofstra
Type of investment	OBO	Co-investor	n/a
Date of investment	25 November 2021	Board representation	n/a

Company description

YOEP is a youth and (young) adult mental care institute (age from 6 until 26+ years) offering outpatient specialized mental care, both diagnostics and treatment. Aside from providing mental care, YOEP has developed its own diagnosis platform (FunctioneringsProfiel – FP), where it has digitalized the diagnosis process to support healthcare professionals in the treatment process.

EBITA %	7,2%	(2,0%)	9,8%	10,3%	1,0%
 Net debt (cash)	 1.929	 1.681			

Note: From 2023 the financials of DPGGZ and Groei&Glunder are included. The 2024A figures include the financials of PHHaastrecht.

The results for Q2 2025 were significantly below budget, with May in particular underperforming. As a result, year-to-date revenue came in 14% below budget expectations.

Key drivers of this underperformance included:

- Billability rates falling short of target, particularly within the GGZ 18+ segment. Within YOEP, annual leave was also exceptionally high in May.
- High absenteeism across the organisation – despite a reduction from over 9% at the start of the year to around 7% – as reintegration of long-term sick employees takes time before they become billable again.
- Lower tariffs within the 18+ segment.
- High staff turnover among practitioners.

Although OPEX was below budget, the savings were insufficient to offset the impact of the lower-than-expected revenue. These factors resulted in a year-to-date EBITDA of EUR -114k.

To address these challenges, a detailed action plan has been developed in collaboration with management. Measures include active coaching and agenda monitoring, the introduction of a digital outpatient clinic starting in September, a reintegration plan for long-term sick employees, a revised vacation policy combined with improved capacity planning, and a targeted cost plan to structurally reduce OPEX.

Net debt per June amounts to EUR 1.7m and comprises EUR 2.3m bank financing minus EUR 0.6m of cash.

Developments:

Internal:

- To strengthen the management team following the departure of the CEO, a CTO was appointed in June alongside the COO.
- A new EHR system has been implemented for both DPGGZ and PHH, supporting digital process optimisation. Preparations are now underway to roll out the system to the remaining teams in the second half of the year.
- Initial discussions regarding care procurement for 2026 have started, and contract negotiations with various municipalities are underway.
- Regarding ESG, in Q2, regarding ESG, YOEP began assessing the sustainability requirements set by health insurers for 2026 to determine their potential alignment with YOEP.

External:

- YOEP has conducted multiple discussions with potential add-on companies, resulting in the signing of an LOI with one potential add-on.

Outlook

- Prioritize operational improvements and further strengthen the team
- Emphasize improving billability and reducing absenteeism within YOEP
- Start due diligence for the identified add-on target

Valuation

Applying a multiple of 5.0x LTM EBITDA leads to an enterprise value of EUR 6.3m. As a result, the fair market value for the stake of HC-GBO IV is EUR 4.1m, which is EUR 3.1m lower than the previous quarter. This implies a loss of EUR 0.9m on a total investment of EUR 5.0m (0.8x money multiple per Q2 2025).

Net debt (cash) 6,136 5,563 na na 3,931

Note: Da Vinci's fiscal year runs from October to September (hence fiscal year 2025 started 01-10-2024).

Da Vinci's financial performance in the first 3 quarters of 2025 is trailing behind budget, primarily due to a seasonal shift in the timing of project revenues. A significant portion of the current order book is now expected to convert in Q4 (July–September), leading to a temporary underperformance in both revenue and EBITDA year-to-date. Given the LE revision earlier this year, the company has implemented Opex-saving measures, including delayed hiring and tighter cost controls, to protect profitability. These actions have helped maintain EBITDA margin levels and contain the impact of delayed and lower volumes vs. last year.

The company continues to operate from a strong commercial position, supported by a well-filled order book. The strategic acquisition of Cambridge Element further strengthens Da Vinci's footprint in the UK market, now one of its key growth geographies. Although not yet reflected in the 2025 financials, Cambridge Element's capabilities in automation are expected to complement Da Vinci's existing instrumentation expertise, opening new cross-selling and delivery opportunities in international markets. A joint strategic growth plan is currently being developed to fully unlock synergies between both entities from 2026 onward.

Net debt per March amounts to EUR 5.6m and comprises EUR 5.6m bank financing, EUR 0.6m vendor loan, minus EUR 0.6m cash.

Developments

Internal:

- In March 2025, Da Vinci experienced an IT security incident that resulted in a temporary systems outage lasting several weeks. The situation was handled professionally, with no apparent damage to systems or data. The incident is being closely monitored, and no further issues have been reported to date.
- International Growth: A plan is being developed and executed to accelerate expansion in Southeast Asia, India, and the UK, focusing on growth opportunities in these markets.
- Focus is on converting strong H2 2025 orderbook into sales.
- Regarding ESG, in Q1 DaVinci internally prepared for the upcoming quality audits. Additionally, following the aforementioned IT incident a stricter security protocol was implemented, including a stronger password policy and a thorough evaluation of user and access rights.

External:

- Finalized acquisition of Cambridge Element (UK add-on) in June 2025.

Outlook

- Acceleration of autonomous growth following execution of new strategic growth plan.

Valuation

Applying a multiple of 5.3x LTM EBITDA leads to an enterprise value of EUR 12.0m. As a result, the fair market value for the stake of HC-GB0 IV is EUR 4.3m, which is EUR 1.2m lower than last quarter. This implies a loss of EUR 0.6m on a total investment of EUR 4.9m (0.9x money multiple per Q2 2025).

In Q2 2025, Cuccibu continued to face persistent challenges, particularly around absenteeism and underperformance in sales. CEO Wouter van Bockel has been working closely with Hender Grievink, who has been supporting on the establishment of new partnerships, strategic decision making, and short-term cash managements to boost sales and optimize cash management. Thanks to the actions taken over the past two months, the company was able to meet its financial obligations in June.

Liquidity pressure remains, and discussions with Rabobank led to the deferral of two repayments. Other measures taken include renegotiated rent payment terms, bi-weekly to weekly invoicing and renegotiated contracts with shorter payment terms. The budgeted EBITDA for H1 for Cuccibu stand-alone is approximately zero; the focus in the second half of the year is on accelerating sales, the reduction of absenteeism and building on partnerships, with growth expected in the second half of the year. DMCC continues to perform above expectations and is ahead of budget with strong cash generation impacting liquidity.

Net debt per June amounts to EUR 2.8m and comprises EUR 3.3m long term bank loan, EUR 0.3m earn-out minus EUR 0.9m cash.

Developments

Internal:

- HR
 - Consultant absenteeism remains elevated – with a sick leave percentage of 7.5% as of June - and continues to impact delivery and billability.
- Organization
 - Increase of financial control by implementing Bright Analytics as a new finance dashboard.
 - New bonus structure that is based on how the Company is performing and not just based on the performance of the consultant.
 - A performance-based recruiter was hired.
 - Revised organizational structure and reporting framework have been introduced to enhance operational efficiency and ensure the balanced allocation of responsibilities.
 - Regarding ESG, in Q2 Cuccibu published a renewed Code of Conduct, which includes updated Anti-Bribery and Corruption, as well as Whistleblower policies. The Personnel Manual has also been revised accordingly.
- Sales
 - Despite reduced availability, order intake in Q2 has been slightly higher than in Q1. As of June, c. 41 assignments were signed.
 - Rates on average stand c.4% higher in Q2 2025 as compared to the same quarter last year.

External:

- Several parties have expressed interest in a potential acquisition of Cuccibu. However, the focus will first be on stabilizing performance and pursuing additional add-on acquisitions before considering any potential exit opportunities.
- Received information of a potential add-on acquisition.

Outlook

- The main internal challenge is improving alignment between sales and delivery functions while also working to reduce the sickness rate.

Valuation

Applying a multiple of 6.0x LTM EBITDA leads to an enterprise value of EUR 5.8m. As a result, the fair market value for the stake of HC-GBO IV is EUR 2.5m, which is EUR 1.3m lower than the previous quarter. This implies a loss of EUR 2.7m on a total investment of EUR 5.3m (0.5x money multiple per Q2 2025).

Net debt (cash)	9,987	9,275	n.a.	n.a.	n.a.

Beyonders' financial performance in the first half of 2025 came in under budget. While the company started the year on a strong note, the second quarter lagged, resulting in revenue and EBITDA falling short of expectations. The shortfall was primarily driven by Little Rocket, which contributed a negative EBITDA, resulting from changing market developments and corresponding lag of demand. Despite the revenue gap, the company managed to contain the overall impact through lower salary expenses and more efficient use of sales and marketing budgets. Operating expenses remained largely in line with the budget, except for slightly higher IT costs due to integration activities.

Net debt per June amounts to EUR 9.3m and comprises of EUR 7.9 bank debt, EUR 2.6m earn-out, EUR 0.9m vendor loans minus EUR 2.2m cash.

Developments

Internal:

- Continued integration of Ambient and Little Rocket, with focus on commercial alignment.
- Preparation for scaling via cross-unit collaboration and up/cross-selling efforts.
- Regarding ESG, in Q2, Beyonder was once again recognized as a Best Workplace according to the Great Place to Work certification, this time in the medium-sized company category. Additionally, during this period, Beyonder published its 2024 Impact Report

External:

- M&A: ongoing discussions with potential add-ons in the Nordics (LOI discussions) as well as Benelux;
- M&A: Mandate provided to Marktlink Poland.

Outlook

Beyonder expects a stronger second half of 2025, supported by a solid pipeline, cross-sell momentum, and six additional working days compared to H1. While full-year revenue may remain below budget, EBITDA is projected to stay within a manageable range due to cost discipline and continued integration efforts.

Valuation

Applying a multiple of 6.1x LTM EBITDA leads to an enterprise value of EUR 24.4m. As a result, the fair market value for the stake of HC-GBO IV is EUR 6.1m, which is EUR 1.2m lower than the previous quarter. This results in a gain of EUR 0.1m on the total investment of EUR 6.0m (1.0x money multiple per Q2 2025).

2.12 Attenza

<i>Legal name</i>	Attenza Group B.V.	<i>Headquarters</i>	Barendrecht
<i>Industry</i>	Healthcare	<i>Investment team</i>	Ewout Prins Margot Engels Marijn Silvis Simon Heffels
<i>Type of investment</i>	OBO	<i>Co-investor</i>	n/a
<i>Date of investment</i>	13 June 2023	<i>Board representation</i>	n/a

Company description

Attenza provides palliative and terminal care for patients who prefer to pass away at home. Through its specialized software application, Attenza can typically commence care within 24 hours of receiving a referral. Home care organizations, hospitals, and general practitioners refer patients to Attenza. The company is certified with a WTZA certification and maintains contracts with healthcare insurers.

Transaction structure

While Attenza's sales still trailed its budget on top-line, EBITDA is largely in line with budget due to gross margins structurally exceeding budgeted levels and a successfully implemented cost savings plan, including FTE base rationalization and IT costs reduction. The Company expects to fully capture long term savings through its shift in IT providers for expense claims, to be finalized early August 2025. Overall, the cost efficiency initiative is expected to realize structural annual OPEX savings of c. 100k EUR.

In the first half of 2025, referrals were up with 7% compared to H1 2024 and the starting percentage of patients increased from 72% in 2024 to 76% in 2025. This resulted in a healthy uptrend in patients served. However, revenue still trailed budget primarily due to a decrease in delivered 'indexed' shifts (c. 2,800 in Q2 2025 vs. c. 3,200 in Q2 2024), which tied to a lower average duration of care, offsetting a higher number of clients. As such, even as client numbers increased, lower-than-expected revenue was driven by a significantly lower average duration of patient care than in 2024. Attenza onboarded 12 new contracts with referrers in 2025 so far, of which the positive impact is expected to materialize in H2 2025.

Attenza's private client services growth is promising, with nearly 100 clients being referred to the Company in Q2 2025. However, the vast majority of referred clients do not start care, as Management is actively looking to improve the quality of referred clients by being referred earlier in the care journey.

Net debt per June totals EUR 0.6m, consisting of EUR 1.5m in bank debt minus EUR 0.9m in cash.

Developments

Internal:

- The Supervisory Board was professionalized and diversified, with two members replaced by individuals with relevant healthcare backgrounds. First RvC sessions have taken place.
- Financial reporting process was streamlined.
- Successfully finalized cost optimizations in IT and FTE base.
- Made preparations to switch IT providers to handle expense claims – move to be finalized early August 2025.
- Establishing new 12-month growth plan with key goals and KPIs.
- Regarding ESG, in Q2, Attenza successfully passed the NEN7510 audit. A few minor points of attention remain and will be addressed in preparation for the re-certification process. Additionally, an employee satisfaction survey was conducted; overall feedback was positive, and follow-up actions have been initiated.

External:

- Due diligence was completed for the potential private care intermediary add-on. However, the closing was put on hold due to Attenza's underperformance. In the meantime, Attenza and the potential add-on have agreed to a partnership to refer (terminal) palliative patients that the private care provider cannot accommodate.
- Submitted NBO for a homecare organization based in Brabant – pending next steps/discussion.
- Attenza continues to explore organic growth opportunities by establishing terminal care services for privately paying clients and. expanding its services to hospices. In Q2 2025, 10+ private clients received care.
- New subcontracting relationships were established with 12 referrers (homecare organizations) since the start of 2025

Outlook

- Focus on increasing the inflow of new patients by securing new referrals in key regions and active relationship with current referrers
- Continued conversations with healthcare insurers with whom Attenza does not have a contract yet.
- Diversifying to additional revenue streams from privately paying clients and services to hospices.
- Monitor performance and re-evaluate possibility to acquire private care add-on or add-on in Brabant.

Valuation

Applying a multiple of 6.1x LTM EBITDA leads to an enterprise value of EUR 4.4m. As a result, the fair market value for the stake of HC-GBO IV is EUR 3.0m, which is EUR 0.2m higher than the previous quarter. This implies a loss of EUR 0.2m on a total investment of EUR 3.2m (0.9x money multiple per Q2 2025).

2.13 Supply Chain Group

Net debt (cash)	3,113	3,481			

In H1 2025, SCG generated EUR 4.1m in revenue, EUR 0.8m below the budgeted EUR 4.9m. The deviation is mainly attributed to a slow start at Supply Chain Company, where billability levels were low in Q1. EBITDA came in at EUR 0.4m, trailing budget due to this delayed conversion of hours into revenue. However, performance began improving in March, and from Q2 onward, the company has been executing in line with the revised latest estimate (LE), supported by the successful conversion of a strong order book.

The LE has been adjusted downward relative to the original 2025 budget, with full-year revenue now expected at EUR 8.9m and EBITDA at EUR 1.2m. This revision reflects a more conservative view of topline conversion for the remainder of the year, based on early underperformance in Q1. Importantly, SCG has undergone a full management transition over the past 12 months, with a new CEO and COO already in place and a CFO starting in July 2025. Since the appointment of the new leadership team, SCG has re-established commercial, operational, and financial control. Commercial execution has been a key priority, with improved billability and backlog conversion from March onwards confirming this renewed grip.

The order book remains strong and provides solid delivery visibility for H2. Management's focus is now on consistent execution and conversion of backlog into revenue, ensuring utilisation remains high across the current team. Opex is expected to remain below budget for the rest of the year, as SCG continues to operate with the existing FTE base and no additional hiring is planned.

Net debt per June amounts to EUR 3.5m and comprises EUR 2.6m bank debt, EUR 0.6m vendor loan, EUR 0.3m financial lease minus EUR 0.1m cash.

Developments

Internal:

- Liquidity remains tight due to weak EBITDA over recent quarters and one-off restructuring costs. As a result, financial covenants are not expected to be met. Since SCG also failed its 2024 end-of-year covenant, discussions with the bank are ongoing.
- Operationally, Q1 was marked by continued transition. A new COO and Tech Lead were onboarded, to replace members of the outgoing management team, concluding the leadership changes initiated last year.
- Regarding ESG, in Q2, Supply Chain finalized a Risk Assessment and Evaluation (RI&E). Additionally, a new CTO and CFO have joined the organization; both will be involved in ESG-related matters.

External:

- In final DD stages with add-on target.

Outlook

- Operational focus on successfully converting the strong order book and improving billability and project execution, particularly within Supply Chain Company.
- Start new CFO.
- Execution of combined strategic plan with add-on.

Valuation

Applying a multiple of 5.8x LTM EBITDA leads to an enterprise value of EUR 2.7m. Given that net debt exceeds this amount, the fair market value for the stake of HC-GBO IV is assessed to be zero, which is equal to the last quarter. This implies a loss of EUR 4.1m on a total investment of EUR 4.1m (0x money multiple per Q2 2025).

2.14 Lopital

<i>Legal name</i>	Lopital Holding B.V.	<i>Headquarters</i>	Oisterwijk

H1 revenue was in line with budget at EUR 6.296k, representing a 27% year-to-date increase compared to 2024. The strongest contributions came from dealers and export markets. Dealers exceeded budget expectations through strong collaboration with their primary partners, while export markets delivered robust growth, particularly in the USA, Canada, and Japan. This solid performance in export and dealer channels more than offset lower-than-budgeted intramural sales.

Within the intramural segment, project business recorded growth in order intake, supported by the successful launch of the Luna X5 ceiling lift. This innovation enabled Lopital to secure several tender-based projects. Gross margin remained on budget, while lower-than-planned operating expenses resulted in year-to-date EBITDA exceeding budget by EUR 61k.

As of June 2025, net debt amounts to EUR 3.1 million, consisting of EUR 4.2 million in bank debt, offset by EUR 1.1 million in cash.

Developments

Internal

- Strong focus on the launch of the new patient lift, Luna X5, which has already resulted in multiple tender wins.
- Ongoing certification of two redesigned chairs, aimed at reducing costs through innovative design improvements and the integration of new suppliers, thereby strengthening competitiveness in export markets.
- Dealer training initiatives delivered to maintain inclusion in preferred supplier packages.
- Regarding ESG, in Q2, audits on the Safety Certificate for Contractors (VCA) were conducted at Lopital. A few minor amendments are currently being processed. Additionally, Lopital's privacy statement has been updated and published on the website.

External

- Evaluation of a pilot program is currently underway with a company producing incontinence sensors, targeted for use in nursing homes.
- Initial introductions have been made with various potential buy-and-build opportunities, both in the Netherlands and abroad.
- NDA has been signed to explore a potential acquisition of a shower chair, aimed at driving Lopital's growth and offering a more comprehensive product portfolio to the market.

Outlook

- Continued execution of the growth plan, with targeted actions across export, dealer, and institutional care sales channels.
- Ongoing product innovation efforts are expected to result in a reduction in cost prices and increased margin resilience.

- Follow-up discussions will take place with several identified buy-and-build candidates to explore strategic expansion opportunities.

Valuation

Applying a multiple of 6.0x LTM EBITDA leads to an enterprise value of EUR 15.3m. As a result, the fair market value for the stake of HC-GBO IV is EUR 11.7m, which is EUR 1.6m higher than the previous quarter. This implies a gain of EUR 2.2m on a total investment of EUR 9.5m (1.2x money multiple per Q2 2025).

Company description

Adjust is a consulting firm based in the Netherlands, specializing in procurement, public EU tendering, and contract management. With 200+ full-time employees, Adjust serves over 400 clients across both public and semi-public sectors, as well as the private sector. The company offers consulting, interim services, and outsourcing solutions, and is developing its own technology tools to transition towards a tech-enabled business model.

Adjust is currently performing slightly below budget, with year-to-date sales of EUR 14.9m (1.1% above last year). Profitability, however, remains under pressure, with EBITDA at EUR 1.6m, approximately EUR 0.9m below budget. While operating expenses are broadly under control, weaker-than-expected sales have led to lower billability, directly impacting profitability. The private sector remains the weakest BU, with revenue c. EUR 0.9m below last year. Low order intake and weak billability continue to weigh on margins. A new BU director will take charge in September with a revised plan to accelerate growth and restore performance. In contrast, the public and semi-public units show strong momentum. Public benefits from billability of c. 87%, while semi-public is expanding through the integration of Pacer. Following a weak Q1, Adjust is beginning to see the first effects of its improvement plan. Forecasting has improved, with tighter planning and stricter billability management now in place. Further impact is expected in the second half of the year, as cost initiatives and improved utilization begin to take hold.

Net debt as of June amounts to EUR 15.7m, comprising EUR 10.2m of bank debt, EUR 3.5m in vendor loans, and EUR 1.6m in financial leases, offset by EUR 0.1m of cash on hand.

Developments

Internal:

- Execution of the company-wide improvement plan launched in Q1 is underway, with first visible effects in forecasting accuracy and margin control.
- Forecasting tools have been rolled out across the organization, allowing for better forward visibility.
- YTD net inflow stands at +14 FTEs, with outflow driven largely by performance management. A new Private BU director has been hired and will start Q3-2025.
- Initial deployment of AI tools for CV handling and tender drafting is underway. These tools are expected to free up consultant capacity in H2.
- Regarding ESG, in Q2, Adjust began reviewing its sustainability approach and started drafting a strategy to embed sustainability within the organization, both in its operations and service offerings.

External:

- Closed the second add-on Pacer which is now fully integrated.
- Signed an LOI with a new add-on, closing is expected in Q3-2025
- In discussions with several potential add-on candidates to explore strategic fit.

Outlook

- Adjust expects financial performance to improve over the remainder of 2025, supported by the rollout of the company-wide improvement plan and additional focus on commercial traction.

Valuation

Applying a multiple of 5.7x LTM EBITDA leads to an enterprise value of EUR 23.3m. As a result, the fair market value for the stake of HC-GB0 IV is c. EUR 3.4m, which is EUR 2.0m higher than the previous quarter. This implies a loss of EUR 0.9m on a total investment of EUR 4.3m (0.8x money multiple per Q2 2025).
